## **Art As Second Nature:**

Second nature ,2017 Second Nature borrows from American philosopher John McDowell's conceptualisation of a second nature in human beings. Second nature consists of conceptual capacities built upon instincts. McDowell contends that the development of these capabilities is facilitated by one's society. Second nature involves the enhancement of one's autonomy and it requires accumulation of experiences. This feature sets second nature apart from first primal nature. Artists as highly autonomous individuals appeal not only to collective experience but also intuition and nature in order to explore humans and their inner selves and their relationship with the outside world. The creation of art requires the combination of human imagination and capability of thinking so as to engage in endless creation. The exhibition is laid out in two exhibition halls. The first hall starts off the exposition by anchoring the content of display on nature and traces of civilisation. The second one exhibits the participating artists' reflections upon the issues they take on through new media interactive pieces and creative modes through which the development of human civilisation can be manifested. Each exhibit is riddled with complexity. The exhibition also raises questions about the root of our nature regardless of our nationalities and communities, the ultimate issue that all of us ponder upon remains the root of the whole human race. The rumination of our past, our history and our expectations for the future are all built upon a shared nature. We reflect upon the intriguing relationship amongst humans, nature and experiences on such common ground.

**Radical Romanticism** Mark S. Cladis, 2025-09-16 Romanticism is often reduced to nostalgic pastoralism and solitary contemplation of the sublime. But a radical strand of Romantic writers and thinkers offered sweeping political, ecological and religious critiques of capitalism, racism, settler colonialism and environmental destruction. Interweaving canonical nineteenth-century authors with Black and Indigenous thinkers who transformed their work, this book is a bold new account of Romanticism for today's deeply entrenched crises. Mark S. Cladis examines the progressive, democratic, religious and environmental beliefs and practices that informed European Romantic literature and its sustained legacies in North America. His interpretation interweaves diverse voices such as W. E. B. Du Bois, Zora Neale Hurston and Leslie Marmon Silko, while also revealing the progressive visions of Romantic authors such as Rousseau, William and Dorothy Wordsworth, Coleridge, Mary Shelley, Thoreau and Margaret Fuller. Forging connections among literary and philosophical traditions while closely reading a wide range of texts, *Radical Romanticism* shows how storytelling is central to the pursuit of justice and flourishing for the human and the more-than-human worlds. Bringing together environmental humanities, literary theory, political theory and religious studies, this book makes the case for a renewed radical Romanticism offering urgent resources for a world beset by catastrophe, uncertainty and despair.
