Charitable Imperative:

The Charitable Imperative Colin Jones, 2024-12-06 Drawing on a wide variety of archival and secondary sources *The Charitable Imperative* originally published in 1989 provides an overview of the very different institutions that treated the poor in France from the seventeenth through to the early nineteenth centuries hospitals and poorhouses military infirmaries reformatories for prostitutes holding places for the insane and so on It recovers much of the daily realities of the institutions for those who lived in or passed through them and highlights the very limited progress made in most of them by the medical profession The principle of charity which underpinned this system of relief placed moral and social obligations on all who dealt with the poor a kind of charitable imperative affected the thinking and behaviour of the administrators who managed the institutions the nursing sisters who gave their lives and the donors who gave up their possessions to meet the needs of the poor However the poor were also expected to pay their part with the result that the Ancien R gime charity subsumed compulsion and repression as well as compassion In spite of efforts to introduce a state sponsored welfare system during the French Revolution the charitable imperative was a legacy of the Ancien R gime to much of the nineteenth century The breadth of institutions covered and the length of the historical period under review will ensure the appeal of this book to a wide variety of historians In particular the chapters on nursing sisters will be of great interest to social historians as well as those working in the history of medicine

The Charitable Imperative Colin Jones, Experiences of Poverty in Late Medieval and Early Modern England and France Anne M. Scott, 2016-04-15 Exploring a range of poverty experiences socioeconomic moral and spiritual this collection presents new research by a distinguished group of scholars working in the medieval and early modern periods Collectively they explore both the assumptions and strategies of those in authority dealing with poverty and the ways in which the poor themselves tried to contribute to exploit avoid or challenge the systems for dealing with their situation The studies demonstrate that poverty was by no means a simple phenomenon It varied according to gender age and geographical location and the way it was depicted in speech writing and visual images could as much affect how the poor experienced their poverty as how others saw and judged them Using new sources and adopting new approaches to known sources the authors share insights into the management and the self management of the poor and search out aspects of the

experience of poverty worthy of note from which can be traced lasting influences on the continuing understanding and experience of poverty in pre modern Europe

Experiences of Charity, 1250-1650 Anne M. Scott, 2016-03-09 For a number of years scholars who are concerned with issues of poverty and the poor have turned away from the study of charity and poor relief in order to search for a view of the life of the poor from the point of view of the poor themselves Great studies have been conducted using a variety of records resulting in seminal works that have enriched our understanding of pauper experiences and the influence and impact of poverty on societies If we return our gaze to charity with the benefit of those studies questions approaches sources and findings what might we see differently about how charity was experienced as a concept and in practice at both community and personal levels In this collection contributors explore the experience of charity towards the poor considering it in spiritual intellectual emotional personal social cultural and material terms The approach is a comparative one across different time periods nations and faiths Contributors pay particular attention to the way faith inflected charity in the different national environments of England and France as Catholicism and Calvinism became outlawed and or minority faith positions in these respective nations They ask how different faith and beliefs defined or shaped the act of charity and explore whether these changed over time even within one faith The sources used to answer such questions go beyond the textual as contributors analyse a range of additional sources that include the visual aural and material

Church and Society in Eighteenth-century France: The clerical establishment and its social ramifications John McManners, 1998 This is the first of two volumes in McManners' magisterial reconstruction of the complex hierarchical world of the Gallican Church destroyed by the French Revolution It describes the diocesan and

parochial structure of the Church portraying the clergy and their lifestyle from the palaces of the aristocratic bishops to the humblest nunnery and in a multitude of portraits analyzing their motivations and sense of vocation In a detailed fresco he presents the religion of the people whether centering in the parish church or in confraternities and the observances of folk religion outside it
