Do Animals Think:

Do Animals Think? Clive D. L. Wynne, 2004 Does your dog really know when you've had a bad day? Noted animal expert Wynne takes aim at the work of such renowned animal rights advocates as Peter Singer and Jane Goodall for falsely humanizing animals. Animal Wise Virginia Morell, 2014-03-25 The New York Times Bestseller that explores animal intelligence and will alter the way we as humans view other species. Have you ever wondered what it is like to be a fish? Or a parrot, dolphin, or an elephant? Do they experience thoughts that are similar to ours, or have feelings of grief and love? These are tough questions, but scientists are answering them. They know that ants teach and rats love to be tickled. They've discovered that dogs have thousand-word vocabularies and that birds practice their songs in their sleep. But how do scientists know these things? Animal Wise takes us on a dazzling odyssey into the inner world of animals and among the pioneering researchers who are leading the way into once uncharted territory: the animal mind. Morell uses her formidable gifts as a storyteller to transport us to field sites and laboratories around the world, introducing us to animal cognition scientists and their surprisingly intelligent and sensitive subjects. She explores how this rapidly evolving, controversial field has only recently overturned old notions about why animals behave as they do. In this surprising and moving book, Morell brings the world of nature brilliantly alive in a nuanced, deeply felt appreciation of the human-animal bond.

What Do Animals Think and Feel? Karsten Brening, 2020-10-06 A fascinating study of animal behavior that reveals them to be as sentient and self-aware as we humans are. In What Do Animals Think and Feel, biologist Karsten Brening has something astonishing to tell us about the animal kingdom: namely, that animals, by any reasonable assessment, have developed the sophisticated systems of social organization and behavior that human beings call culture. Dolphins call one another by name, and orcas inhabit a culture that is over 700,000 years old. Chimpanzees wage strategic warfare, while bonobos delight in "dirty talk." Ravens enjoy snowboarding on snow-covered roofs, and snails like to spin on hamster exercise wheels. Humpback whales follow the dictates of fashion, and rats are dedicated party animals. Ants recognize themselves in mirrors and spruce themselves up before they return home. Ducklings can pass complicated tests in abstract thinking. Dogs punish disloyalty, though they are also capable of forgiveness if you apologize to them. Brening draws on the latest scientific findings, as well as his own experience working with animals, to reveal a world of behavioral and cognitive sophistication that is remarkable, similar to our own.

Wild Minds Marc Hauser,2000-03-09 Do animals think Can they count Do they have emotions Do they feel anger frustration hurt or sorrow Are they bound by any moral code At last here is a book that provides authoritative answers to these long standing questions Most pop science books tend to anthropomorphize and romanticize animals presenting them as furry little humans or as creatures that cannot think or feel at all Marc Hauser an acclaimed scientist in the field of animal cognition uses insights from evolutionary theory and cognitive science to examine animal thought without such biases or preconceptions For example do species that share food or travel in large groups have greater innate mathematical abilities Hauser treats animals neither as machines devoid of feeling nor as extensions of humans but as independent beings driven by their own complex impulses In prose that is both elegant and edifying Hauser describes his groundbreaking research in the field leading his readers on what David Premack author of *The Mind of an Ape* calls a masterful tour of the animal mind
