The People's Platform Astra Taylor, 2014-04-15 An invaluable primer for anyone seeking to understand why our networked world isn't all that it is cracked up to be The Guardian The Internet has been hailed as an unprecedented democratizing force a place where everyone can be heard and all can participate equally But how true is this claim In a seminal dismantling of techno-utopian visions The People's Platform argues that for all that we tweet and like and share the Internet in fact reflects and amplifies real world inequities at least as much as it ameliorates them Online just as off-line attention and influence largely accrue to those who already have plenty of both What we have seen so far Astra Taylor says has been not a revolution but a rearrangement Although Silicon Valley tycoons have eclipsed Hollywood moguls a handful of giants like Amazon Apple Google and Facebook remain the gatekeepers And the worst habits of the old media model the pressure to seek easy celebrity to be quick and sensational above all have proliferated on the web where aggregating the work of others is the surest way to attract eyeballs and ad revenue When culture is free creative work has diminishing value and advertising fuels the system The new order looks suspiciously like the old one We can do better Taylor insists The online world does offer a unique opportunity but a democratic culture that supports diverse voices and work of lasting value will not spring up from technology alone If we want the Internet to truly be a people's platform we will have to make it so Beautifully written and highly recommended David Byrne musician and author
