Does Aid Work:

Does Aid Work in India? Michael Lipton, John Toye, 2010-11-29 Much about India's economy and aid flows has changed in the last two decades India's growth rate has quickened since economic liberalisation the poverty head count has fallen and the volume and composition of its aid have changed as new issues of climate change and the environment have emerged Yet *Does Aid Work in India* first published in 1990 remains of great interest as a study of aid effectiveness in India's pre liberalisation era It identifies those sectors where aid funded interventions succeeded and where they failed It explains how India avoided problems of aid dependence and managed the political tensions that are associated with aid policy dialogue More generally it contains a useful commentary on and criticism of donors aid evaluation procedures at that time and it highlights donor efforts in the difficult area of institution building Despite the passage of time many of the insights from India's earlier experience remain highly relevant to key issues of development assistance today

Does Aid Work? Robert Cassen, 1994 The question of the effectiveness or counter productivity of foreign aid is one of the great issues facing the world today This volume arose from a study conducted for an inter governmental task force The team surveyed the published literature reviewed existing evaluations of aid projects and undertook seven detailed country studies The basic finding is that the majority of aid succeeds in terms of its own objectives and obtains a reasonable rate of return At the same time this book analyses the frequent failings of aid projects compares these failings with other forms of private and public investment and proposes measures for improving aid effectiveness New to this edition For the second edition the book has been shortened removing mainly the more technical parts The data in the text and tables have been brought up to date the text has been revised and each chapter has a new section added reviewing the areas of debate and research findings since 1986 The bibliography has also been updated

Does Foreign Aid Really Work? Roger C. Riddell, 2008-08-07 Foreign aid is now a 100bn business and is expanding more rapidly today than it has for a generation But does it work Indeed is it needed at all Other attempts to answer these important questions have been dominated by a focus on the impact of official aid provided by governments But today possibly as much as 30 percent of aid is provided by Non Governmental Organizations NGOs and over 10 percent is provided as emergency assistance In this first ever attempt to provide an overall assessment of aid Roger Riddell presents a rigorous but highly readable account of aid warts and all *Does Foreign Aid Really Work* sets out the evidence and exposes the instances where aid has failed and explains why The book also examines the way that politics distorts aid and disentangles the moral and ethical assumptions that lie behind the belief that aid does good The book concludes by detailing the practical ways that aid needs to change if it is to be the effective force for good that its providers claim it is

Does Aid Work? New Evidence from Recent Empirical Studies Niels Hermes, Robert Lensink, 2006 The main message of the *Assessing Aid* report of the World Bank 1998 is that aid is effective in stimulating economic growth but only when the

government policies of the recipient country are good Donor countries have picked up this message and have used it to become more selective when making countries eligible for aid We review the empirical literature that has contested the main conclusions of the report According to our review the critics convincingly show that the conclusions are based on fragile econometric evidence Moreover they criticise the measurement of good policy by the World Bank The critics also come up with alternative explanations of the effectiveness of aid such decreasing returns of aid and the importance of geographical or climate related circumstances Based on our review we conclude that donors that have based their policies on the results of the Assessing Aid report should reconsider their policies of aid selectivity and use other criteria than good policy
