Animals And Other People:

Animals and Other People Heather Keenleyside, 2016-10-03 In *Animals and Other People* Heather Keenleyside argues for the central role of literary modes of knowledge in apprehending animal life Keenleyside focuses on writers who populate their poetry novels and children's stories with conspicuously figurative animals experiment with conventional genres like the beast fable and write the lives of mice as well as men From such writers including James Thomson Daniel Defoe Jonathan Swift Laurence Sterne Anna Letitia Barbauld and others she recovers a key insight about the representation of living beings when we think and write about animals we are never in the territory of strictly literal description relying solely on the evidence of our senses Indeed any description of animals involves personification of a sort if we understand personification not as a rhetorical ornament but as a fundamental part of our descriptive and conceptual repertoire essential for distinguishing living beings from things Throughout the book animals are characterized by a distinctive mode of agency and generality they are at once moving and being moved at once individual beings and generic or species figures every cat is also The Cat Animals thus become figures with which to think about key philosophical questions about the nature of human agency and of social and political community They also come into view as potential participants in that community as one sort of people among others Demonstrating the centrality of animals to an eighteenth century literary and philosophical tradition *Animals and Other People* also argues for the importance of this tradition to current discussions of what life is and how we might live together

Animals and Other People Louis Bromfield, 2008-03-01 Here is a book to delight people of all ages *Animals and Other People* is about wild and domestic animals about pets ranging from a wild tom turkey to a mongoose and about people who are teched and have that inner sense and mystical feeling which makes them one with nature and with animals and birds The book ranges from comedy to tragedy The stories are sensitive and intimate for Louis Bromfield is aware that every animal and bird has a personality of its own and that even among cows there are music lovers clowns and termagants As Ellen Bromfield Geld remarked as a child The trouble with the animals on this farm is that they all think they're people

Animals of the World for Young People Charles Robert Knight, 1908

Animals in Person John Knight, 2020-08-29 Our relationship with animals is complex and contradictory we hunt kill and eat them yet we also love respect and protect them This ambivalent relationship is further complicated by the fact that we attribute human emotions and intelligence to animals We even go as far as likening them to children and treating them as family members Drawing on a diverse range of case studies *Animals in Person* attempts to unravel our close and fascinating link with the animal kingdom This book highlights the theme of cross species intimacy in contexts such as livestock care pet keeping and the use of animals in tourism The studies draw on data from different parts of the world including New Guinea Nepal India Japan Greece Britain The Netherlands and Australia *Animals in Person* documents the existence of relations between humans and animals that in many respects recall relations among humans themselves

Plants, Animals, People, Aliens Marie I. George, 2025-07-25

Aristotle famously maintains in his treatise *On the Soul* that there are three kinds of living things: plants, animals, and humans, and he speaks of each kind as having a soul. St. Thomas Aquinas adopts these same views. Nowadays, however, many thinkers reject them on the grounds that they are incompatible with modern science. Molecular biology is seen as affording a superior way of categorizing life forms. Evolutionary biology appears to have established that humans are simply primates with adaptations somewhat different from other primates. Plant physiology, uncovering plants' directional responses to a wide variety of different stimuli, provides reason to think that plants sense light, pressure, odor, pathogens, etc. In which case, plants are simply non-mobile animals, similar to coral. Neuroscience, by showing the dependency of thought, choice, perception, and emotion on the central nervous system, especially on the brain, seems to have eliminated any need to posit a soul. *Plants, Animals, People, Aliens* addresses these and a variety of other science-based claims about living things by bringing Aristotelian Thomistic teachings to bear upon them. While not a systematic work, it both treats some of the most hotly debated philosophical questions concerning living things, such as what it means to be alive, as well as treating questions less often raised by philosophers, such as whether animals have a theory of mind. Though geared primarily to those conversant with the Aristotelian Thomistic tradition, many of its key concepts are traced back to experiences that we all share in common, thus rendering these concepts intelligible, if not convincing, to those with scientific and other backgrounds who are curious about this philosophical approach to living things. The author strives to show how Aristotelian Thomistic philosophy and science complement one another by sketching out the fuller understanding of the living realm that the two together provide. The book's final section considers the possibility and the likelihood that embodied rational beings exist elsewhere in our universe. Here, theological arguments drawn from the Christian faith are presented alongside philosophical and scientific arguments. This section closes with a theological discussion of the disputed question of whether extraterrestrials, were they to exist, should be baptized.

[Making a Stand for Animals](#) Oscar Horta, 2022-06-23 Engaging and thought provoking, this book examines how humans see and treat other animals and argues that we should extend equal consideration and respect to all beings, human and nonhuman alike. Our world is plighted by isms such as racism and sexism, but we may have overlooked a very important one: speciesism. Speciesism is a form of discrimination against those who don't belong to a certain species. It drives us to see nonhuman animals as objects rather than individuals with their own interests and with the ability to feel and suffer. This book questions all of the assumptions speciesism is based upon. It raises many challenging questions over humans' very complicated attitudes toward other animals. Thinking about how animals are used, as well as the suffering of wild animals, and what the future may be for all beings, this book calls for society to seriously take into account the interests of all animals. For all who care about animals, or simply how to make the world a better place, this book is essential reading.
