Animals in Translation Temple Grandin, Catherine Johnson, 2006 Animal scientist Temple Grandin argues that people with autism think the way animals think and draws from her experiences with autism to discuss how animals think act and feel

Animals in Translation Temple Grandin, 2010 Identifies commonalities between animals and autistics based on the author's life as an autistic offering insight into how animals process sensory information and how they often possess unrecognized savant level talents

Animals in Translation Temple Grandin, Catherine Johnson, 2006 Animals in Translation is the culmination of Temple Grandin's extraordinary life's work drawing upon the latest research her distinguished career as an animal scientist and her own experience of being autistic With co author Catherine Johnson Grandin argues that while normal people convert experience into words and abstractions animals and autistics process the world as sensory information specific pictures sights and sounds This difference is the key to understanding how animals see think and feel As much a revelation about life with autism as it is about life with animals Animals in Translation explores pain fear aggression love friendship communication and learning in a startling book that will change the way you think about animals

Animals in Translation Temple Grandin, 2009-07-01 **Animals in translation : using the mysteries of autism to decode animal behaviour** Catherine Johnson, 2005 Temple Grandin has been known to crawl through slaughterhouses to get a sense of what the animals there are experiencing An autistic woman who as a child was recommended for institutionalisation Grandin has managed not only to enter society's mainstream but ultimately to become prominent in animal research An associate professor at Colorado State University she designs facilities used worldwide for humane handling of livestock She also invented a hug machine based on a cattle holding chute that calms autistic children In Animals in Translation co authored with science writer Catherine Johnson Grandin makes an intriguing argument that psychologically animals and autistic people have a great deal in common and that both have mental abilities typically underestimated by normal people The book is a valuable if speculative contribution to the discussion of both autism and animal intelligence two subjects on which there is little scientific consensus

Natures in Translation Alan Bewell, 2017-01-02 Understanding the dynamics of British colonialism and the enormous ecological transformations that took place through the mobilization and globalized management of natures For many critics Romanticism is synonymous with nature writing for representations of the natural world appear during this period with a freshness concreteness depth and intensity that have rarely been equaled Why did nature matter so much to writers of the late eighteenth and early nineteenth centuries And how did it play such an important role in their understanding of themselves and the world In *Natures in Translation* Alan Bewell argues that there is no Nature in the singular only natures that have undergone transformation through time and across space He examines how writers as disparate as Erasmus and Charles Darwin Joseph Banks Gilbert White William Bartram William Wordsworth John Clare and Mary Shelley understood a world in which natures were traveling and resettling the globe like never before Bewell presents British natural history as a translational activity aimed at globalizing local natures by making them mobile exchangeable comparable and representable Bewell explores how colonial writers in the period leading up to the formulation of evolutionary theory responded to a world in which new natures were coming into being while others disappeared For some of these writers colonial natural history held the promise of ushering in a cosmopolitan nature in which every species through trade and exchange might become a true citizen of the world Others struggled with the question of how to live after the natures they depended upon were gone Ultimately *Natures in Translation* demonstrates that far from being separate from the dominant concerns of British imperial culture nature was integrally bound up with the business of empire
