

Animals That Build Homes

Wendy Perkins

Animals That Build Homes:

Animal Architects Julio Antonio Blasco, Daniel Nassar, 2015-08-04 A fantastic original exploration of how animals build their homes and the fascinating structures they create From gladiator frogs to chimpanzees learn about how animals all over the world build their homes Each spread contains a beautiful colourful illustration of each animal and its home plus a unique fold out information panel with stats and a simple architectural diagram showcasing the creation of the architect Look inside chimpanzee nests beaver dams termite mounds stork nests and many more and get to know the clever animals who build them

Animal Architects Wanda Shipman, 1994 Explores a variety of animal habitats proving that nature has many talented architects

Animals Building Homes Wendy Perkins, 2004 Explains the varied ways in which such animals as beavers hummingbirds termites and bald eagles build their homes

Animals that Build Their Homes Robert M. McClung, 1976 Text and photographs discuss animals that build their own homes including beavers crayfish and bees

Animals That Build Homes Kyle Carter, 1995-01-01 **We Build Our Homes** Laura Knowles, 2018 We Build Our Homes is a beautifully illustrated picture book exploring the incredible structures built by animals and the reasons why they build them Each spread looks at a different animal told as though from their viewpoint

How Mammals Build Their Amazing Homes W. Wright Robinson, 1999 Describes how mammals such as beavers chimpanzees moles and badgers build homes to keep them safe from predators and the elements

Animals Build Amazing Homes Hedda Nussbaum, 1979 Describes the construction and the function of the homes built by 15 different animals

Built by Animals Mike Hansell, 2007-10-18 From termite mounds that in relative terms are three times as tall as a skyscraper to the elaborate nests of social birds and the deadly traps of spiders the constructions of the animal world can amaze and at times humble our own engineering and technology But how do creatures with such small brains build these complex structures What drives them to do it Which skills are innate and which learned Here Mike Hansell looks at the extraordinary structures that animals build whether homes traps or courtship displays and reveals the biology behind their behaviour He shows how small brained animals achieve complex feats in a small brained way by repeating many simple actions and using highly evolved self secreted materials On the other hand the building feats or tool use of large brained animals such as humans or chimps require significantly more complex and costly behaviour We look at wasp s nests leaf cutting ants caddisflies and amoebae and even the extraordinary bower bird who seduces his mate with a decorated pile of twigs baubles feathers and berries Hansell explores how animal structures evolved over time how insect societies emerge how animals can alter their wider habitat and even whether some animals have an aesthetic sense

180 Days☐: Hands-On STEAM for Grade K Chandra Prough, 2022-05-20 Help kindergarten students improve their critical thinking skills with hands on lab activities that integrate STEAM concepts 180 Days Hands On STEAM for Grade K Uses daily hands on lab activities to explore STEM concepts Motivates students with quick independent learning activities focusing on exploring STEAM concepts building

101 Different Ways to Build Homes and Pens for Your Animals Randy LaTour,2011 Animals need their own space and nowhere is this more apparent that for those who own multiple animals When not given their own private space to be alone in many animals especially dogs and livestock will become overly territorial marking space and fighting with other animals or even humans for a place to call their own Yet many owners put off or overlook the need for building homes for their animals because they think it might be too hard or time consuming That could not be further from the truth however and this book aims to prove just that Written for every pet and livestock owner who has sighed or groaned at the prospect of building a home for their animals this book shows you 101 different ways you can cut cost and time effectively build a viable home for your animals You will learn in this book how to create homes from scratch for dozens of different kinds of animals First and foremost you will learn how to assess the needs of your animals according to breed and personality from indoor domesticated pets to outdoor livestock You will learn what features these homes need to match your animals according to size feeding habits gender whether you have more than one and whether they will be bred or not You will learn which building materials are best for which breeds homes and how these materials can be purchased and used by yourself at home Experts ranging from dog and cat breeders to small farmers have been interviewed for this book to learn more about their experiences with animal homes and they have provided a number of insights into how these homes can and should be built More than 101 different plans and methods for home building will be laid out for you in detailed methods that allow you to effectively start building these homes and seeing to the specific needs of every animal in your home or on your farm

The Book of Popular Science ,1929 *Animal Homes* Anita Ganeri,1997 Describes the natural habitats of animals

throughout the world and how these animals have developed a way of life that helps them fit into a particular place and climate

Teaching Early Years Mathematics, Science and ICT Annette Hilton, 2020-07-22

When young children first arrive at school they generally know how to use a mobile phone and a tablet and how to count share and measure They have a sense of wonder about the world around them They expect to further interact with technology and to build and extend their mathematics and science knowledge Teaching Early Years Mathematics Science and ICT shows how teachers of children in their first three years of formal schooling can guide students in developing a sound understanding of the key concepts in mathematics and science in classroom and field activities It shows how to select appropriate educational technology and effectively and routinely integrate it into the learning experience as part of students wider classroom learning Throughout the authors make connections between children s out of school and in school experiences as well as connections across key learning areas They provide real classroom examples of learning experiences which can be adapted for different year levels A reflection template assists teachers in planning and successfully implementing teaching strategies to meet curriculum requirements Teaching Early Years Mathematics Science and ICT helps teachers bridge theory and practice in teaching children aged 5 to 8 years
