Auerbach,2023-03-14 How the autonomous digital forces jolting our lives as uncontrollable as the weather and plate tectonics are transforming life society culture and politics David Auerbach s exploration of the phenomenon he has identified as the meganet begins with a simple startling revelation There is no hand on the tiller of some of the largest global digital forces that influence our daily lives from corporate sites such as Facebook Amazon Google YouTube Instagram and Reddit to the burgeoning metaverse encompassing cryptocurrencies and online gaming to government systems such as China s Social Credit System and India s Aadhaar As we increasingly integrate our society culture and politics within a hyper networked fabric Auerbach explains how the interactions of billions of people with unfathomably large online networks have produced a new sort of beast ever changing systems that operate beyond the control of the individuals companies and governments that created them Meganets Auerbach explains have a life of their own actively resisting attempts to control them as they accumulate data and produce spontaneous unexpected social groups and uprisings that could not have even existed twenty years ago And they constantly modify themselves in response to user behavior resulting in collectively authored algorithms none of us intend or control These enormous invisible organisms exerting great force on our lives are the new minds of the world increasingly commandeering our daily lives and inner

realities Auerbach's analysis of these gargantuan opaque digital forces yield important insights such as The conventional wisdom that the Googles and Facebook of this world are tightly run algorithmic entities is a myth No one is really in control The efforts at reform to get lies and misinformation off meganets run into a brick wall because the companies and executives who run them are trapped by the persistent evolving and opaque systems they have created Bitcoin and other cryptocurrencies are uncontrollable and their embrace by elite financial institutions threatens the entire economy We are asking the wrong questions in assuming that if only the Facebooks of this world could be better regulated or broken up that they would be better more ethical citizens Why questions such as making algorithms fair and bias free and whether AI can be a tool for good or evil are wrong and misinformed Auerbach then comes full circle showing that while we cannot ultimately control meganets we can tame them through the counterintuitive measures he describes in detail *Hobbies*, 1967 *The Glass Packer*, 1949 **American Druggist**, 1955 *Dressed Animality* Lisa Moravec, 2024-10-09 The book applies a productive interdisciplinary lens of art history performance and animal studies for approaching political economy issues critiquing anthropomorphic worldviews and provoking thoughts around animal and human nature that spark impulses for an innovative performance aesthetics and ethics It combines Marxist analysis with feminist and posthumanist methodology to analyse the relation between societal dressage and bodily animality that humans and animals share Within this original theoretical framework the book develops the concept of dressaged animality as a mode of critique to analyse the social and political function of interdisciplinary forms of contemporary performances Drawing on archival and primary research the book theorises and historicises more than 15 performance practices in which animality is allegorically staged through by humans danced real or filmically mediated animals It focuses on Rose English's pioneering approach to performance making as well as on overlooked performances by other renown and largely unknown American Mike Kelley Kate Foley Robert Morris Bruce Nauman Yvonne Rainer Diana Thater British Mark Wallinger Rose English and European artists Tamara Grcic Judith Hopf Joseph Beuys Bartabas from the late 1960s until the late 2010s While various types of artistic practice are framed as forms of critique for example protest art interventionist strategies institutional critique the book maps an original performance theory in art which shows that contemporary artistic performances can also take up a critique of societal dressage This study will be of great interest to students and scholars in art history theatre dance and performance studies and ecology as well as to artists and curators working with performance **Playthings**, 1925 *National 4-H Club News*, 1942 *Showmen's Motion Picture Trade Review*, 1945 *The Ladies' Home Journal* Edward William Bok, 1911 **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress.
