paradigms wont work in the coming years because the exponential growth and decay that underlie their functioning is unsustainable He goes on to say that our product based way and view of life has had a devastating effect on our understanding of process in our lives Kinsch goes to the root of the problem and discusses How the workings of our brain show our perceptions may be unreliable and we may have some control over our own perceptions of happiness The phenomenon of near death experiences and why they occur more frequently in the modern age Why man is progressing toward a higher consciousness and that these experiences are part of the evolutionary process The zero point field a part of quantum physics showing that what seems impossible is capable of being studied and researched World religions and the role theyve played in the world to this point After admitting the failure of religion to remain open to truth in others Together in the Space Between offers hope through Kinschs unique interpretation of the Eucharist He offers a survival guide to adapt to the changes that need to be made and are certainly coming
