

Some Broader Thoughts

- Need to end the complexity bias in our regulatory system. Lean against forms of ‘financial innovation’ that promise risk transfer benefits but increase fragility.
- Examine increased support for commercial banking model of on-book lending.

Broader Thoughts:

Thinking Through Dementia Julian C. Hughes, 2011-02-17 With a rapidly expanding elderly population there has been a marked increase in the incidence of dementia and this dreadful debilitating illness now affects directly or indirectly millions of people across the world Dementia throws up a number of particular clinical ethical and conceptual problems which mostly reflect complicated evaluative decisions for instance about diagnosis and the distinction between normal and abnormal ageing Different disciplines approach dementia in different ways thus there are disease cognitive neuropsychology and social constructivist models of dementia Underlying these models and approaches each of which is clinically useful are various and differing conceptual commitments These models carry ethical implications concerning how we ought to treat people suffering from dementia *Thinking through Dementia* offers a critique of the main models used to understand dementia the biomedical neuropsychological and social constructionist It discusses both clinical issues and cases together with philosophical work that might help us better understand and treat this illness Drawing on philosophical critique of models of dementia as well as empirical data and clinical experience the book unifies the biological psychological and social accounts of illness and disease Highly original and thought provoking this book will interest psychiatrists philosophers psychologists and anyone involved in the care and management of those with dementia
