Brookings Trade Forum 1999:

Brookings Trade Forum: 1999 Susan M. Collins, Robert Z. Lawrence, 2010-12-01 Growing economic integration has become a major concern among policymakers and international institutions in the 1990s. In light of this concern, the practitioners and academics contributing to the Brookings Trade Forum 1999 have focused on key aspects of governing in a global economy. This is the second in the Brookings Institution series of annual volumes that provide the most authoritative and in-depth analysis available on current and emerging issues in international trade. The 1999 edition focuses on governing in a global economy. Contents include: Policies in a Globalized Economy by Paul R. Krugman, Massachusetts Institute of Technology; The Domestic Political Resistance to U.S. Global Leadership by I. M. Destler, University of Maryland and Institute for International Economics; The Future of the World Trade Organization by Sylvia Ostry, University of Toronto; Fin de Siècle: Is Globalization Today Really Different than Globalization a Hundred Years Ago by Michael Bordo, Rutgers University; Barry Eichengreen, University of California Berkeley; and Douglas Irwin, Dartmouth College. **Governing the Global Economy: Does One Architectural Style Fit All?** by Dani Rodrik, Harvard University. Globalization and the Poor Jay R. Mandle, 2003-02-17 The argument the author presents is that globalization is associated with the economic growth necessary to alleviate poverty. Globalization therefore should be encouraged. At the same time, governments must adopt policies that address the needs of those who are victimized by the dislocations caused by the process. The book responds to the opponents by emphasizing globalization's potential to alleviate poverty but at the same time is critical of those who defend globalization without acknowledging the costs it imposes on innocent victims. In addressing the activist opponents of the process, the author maintains that they should not reject the global integration of world markets because of a concern for justice. Instead, activists can advance the interests of the world's poor by mounting political movements to advance international agreements to stabilize the world economy and ensure labor rights. **Rethinking the East Asian Miracle** Joseph E. Stiglitz, Shahid Yusuf, 2001-06-01 This volume provides highly illuminating analytic perspectives on key facets of the East Asian economies. It discusses weaknesses in the financial sector, corporate governance, exchange rate and trade policies, regulatory capability, and proposes remedies. **Rethinking the East Asian Miracle** is an indispensable book for all those with an interest in East Asia's prospects in the early decades of the new century. **Laggards and Leaders in Labour Market Reform** Jenny Corbett, Anne Daly, Hisakazu Matsushige, Dehne Taylor, 2009-09-10 A flexible labour market is widely regarded as a key factor in encouraging economic growth and prosperity. In recent years, some economies have successfully reformed their labour markets, making part-time and flexible hours easier, limiting the restrictive practices of trade unions, encouraging training, and the enhancement of the skills of those in the labour market, coping with the changing age profile of the workforce and in other ways. Other economies have been less successful at labour market reform and continue to struggle with outdated structures and practices. This book discusses the key elements of labour market reform, contrasting a country where reforms

have been successfully carried through Australia with a country where reforms have been less successful Japan At the same time this book challenges the conventional view that Australia is the lucky country for all its workers given the rising hours worked for those in work and the difficulties for young people entering the labour market Both countries also face issues in terms of an ageing population and policy challenges in the design of safety nets and pension provision The book thereby demonstrates to analysts of labour market reform worldwide the key elements of successful labour market reform and the consequential effects when the reforms are carried through or not

Globalizing Europe Thomas L. Brewer, Paul Brenton, Gavin Boyd, 2002-01-01 The contributors to this volume are internationally recognised scholars in the field The result is an extremely comprehensive and authoritative assessment of European integration particularly from an economic political perspective Economic Outlook and Business Review Globalizing Europe examines the involvement of the European Union in the deepening integration that results as trade and transnational production link markets and economic systems across the world This process is posing a unique challenge to European decision makers to implement measures that will maximize the benefits and reduce the costs of globalization

Financial Statecraft Benn Steil, 2006-01-31 As trade flows expanded and trade agreements proliferated after World War II governments most notably the United States came increasingly to use their power over imports and exports to influence the behavior of other countries But trade is not the only way in which nations interact economically Over the past two decades another form of economic exchange has risen to a level of vastly greater significance and political concern the purchase and sale of financial assets across borders Nearly 2 trillion worth of currency now moves cross border every day roughly 90 percent of which is accounted for by financial flows unrelated to trade in goods and services a stunning inversion of the figures in 1970 The time is ripe to ask fundamental questions about what Benn Steil and Robert Litan have coined as financial statecraft or those aspects of economic statecraft directed at influencing international capital flows How precisely has the American government practiced financial statecraft How effective have these efforts been And how can they be made more effective The authors provide penetrating and incisive answers in this timely and stimulating book

Annual World Bank Conference on Development Economics 2000 Boris Pleskovic, Nicholas Stern, 2001 Annotation This 12th Annual World Bank Conference on Development Economics focuses mainly on four areas new development thinking crises and recovery corporate governance and restructuring and social security including public and private savings

Macroeconomic Policies in the World Economy Horst Siebert, 2004-08-02 The integration of goods and financial markets has progressed on a global scale in recent years Thus the cyclical patterns in the world economy may have changed too Against this background experts in international economics analyze the synchronization of business cycles and their volatility in this book Is there an European business cycle What is the role of multinational corporations and monetary policy in transmitting business cycles Further they discuss the need and feasibility of internationally coordinating monetary and exchange rate policies and the quantitative effects of tax competition

Annual Editions Don Cole,2004-12 Gives you articles from various public press sources such as Foreign Policy The Brookings Review and The World income distribution and economic justice and the changing global economy It is supported by a student website [The Anti-Dumping Agreement and Developing Countries](#) Aradhna Aggarwal,2006-10-20 In the era of globalization trade policy has become a key development tool and expanding exports a major policy objective for developing countries However pressures for protectionism are threatening to reverse the gains The surge of anti dumping practices in the 1990s in many countries have triggered an intense debate on the anti dumping agreement and its implementation This volume analyses the importance of anti dumping from a developing country s perspective The author investigates the use of anti dumping in a comparative framework and reviews the genesis and evolution of the Agreement and its legal provisions She further discusses the economic and non economic justifications of anti dumping use and empirically analyses the macro economic factors motivating countries to use anti dumping Finally she examines the wide ranging proposals to reform the WTO anti dumping code The analysis brings out a bias against developing countries and stresses the need for fundamental reform of current anti dumping rules The author also reflects on plausible approaches to refine existing provisions and explores the possibility of reform by including a Public Interest Test She suggests updating the special and differential treatment provisions to remedy existing imbalances

South Africa's Reintegration Into World and Regional Markets Regine Qualmann,2007 Examines the economic transformation process and its role for the liberalization of trade during the period 1980 2000 Highlights an analytical approach based on trade theory with applications to actual trade flows Discusses scale economies market size and distance between trading partners and regional trade integration with particular reference to potential implications of South Africa s free trade arrangement with SADC

One Hundred and Thirty Years of Central Bank Cooperation C. E. V. Borio,Gianni Toniolo,2006 With the insight of 130 years of history this paper tries to answer three questions how did changing international monetary and financial conditions shape the targets and tools of central bank cooperation What factors influenced its intensity Did a structured organisation such as the BIS make a difference to its effectiveness We show that while central bank cooperation through history was ultimately directed to ensuring monetary and financial stability the conception of these objectives the relationship between the two the balance in their pursuit and the strategies followed evolved over time reflecting changes in the monetary and financial environment as well as in the intellectual climate In turn the intensity of central bank cooperation was influenced by the state of international relations the prestige and degree of autonomy of central banks and the technical nature of the issues requiring cooperation We also argue that the BIS made a material difference at least when conditions allowed

[Information Costs and Home Bias](#) Alan G. Ahearne,William L. Grier,Francis E. Warnock,2000 We aim to provide insight into the observed equity home bias phenomenon by analyzing the determinants of U S holdings of equities across a wide range of countries In particular we

explore the role of information costs in determining the country distribution of U S investors equity holdings using a comprehensive new data set on U S ownership of foreign stocks We find that U S holdings of a country s equities are positively related to the share of that country s stock market that is listed on U S exchanges even after controlling for capital controls trade links transaction costs and historical risk adjusted returns We attribute this finding to the fact that foreign firms that list on U S exchange are obliged to provide standardized credible financial information thereby reducing information costs incurred by U S investors This obligation stems from U S investor protection regulations which include stringent disclosure requirements reconciliation of financial statements to U S standards and an investor friendly regulatory environment Our results support the hypothesis that information costs are an important source of home bias Foreign countries whose firms do not alleviate information costs by listing on a U S exchange are more severely underweighted in U S equity portfolios **Economic Review**, 2004 Annual Report Brookings Institution, 2000 Managing Global Issues P. J. Simmons, 2001 This is the result of an international multidisciplinary research team composed of experts in specific global issue areas The book s broad scope numerous case studies and rigorous comparative analytical framework makes a contribution to the rapidly growing literature on global governance **The Political Economy of Financial Crises** Roy E. Allen, 2004 **Reforming the International Financial Architecture** Il SaKong, 2000 Antidumping in the Americas José Tavares de Araújo Júnior, Carla Macario, Karsten Steinfatt, United Nations. Economic Commission for Latin America and the Caribbean. International Trade Unit, 2001 Developed countries and a growing number of developing countries have increasingly relied on antidumping laws to provide import relief to particular economic sectors As practiced today however antidumping also entails heavy costs for the foreign firms targeted by this policy and for consumers in the country applying antidumping legislation The publication argues that the debate on antidumping should be viewed taking into account the negotiations to create the Free Trade Areas of the Americas FTAA as well as the costs and benefits of all import relief measures including safeguards
