Wellens,2012-12-06 A unique overview of all major angiographic lipid intervention trials presented by their principal investigators Basic mechanisms and methodological aspects including biochemical as well as angiographic aspects

are discussed by experts in these fields A careful comparison of all available data permits an analysis to be made of what may currently be considered proved which aspects merit further investigation and which hypotheses should be rejected Audience Clinicians involved in the practice of lipid lowering and investigators involved in lipid lowering clinical trials Scientists involved in other areas of lipid research and investigators conducting coronary angiographic trials designed to study the influence of different interventions will find a wealth of information and practical guidelines in this book Mitochondrial Medicine Anna Gvozdjaková,2008-02-01 Mitochondrial medicine deals with diseases that are related to mitochondrial dysfunction due to a number of causes from free radical damage to genetic mutation This book is based on extensive data gathered over 30 years of clinical and experimental research In it internationally recognized authors share their experience in various fields of their expertise and guide readers through the disease process from basic biochemical mechanisms to diagnosis to therapeutic aspects *Surgical Options for the Treatment of Heart Failure* R. Masters,2000-01-31 This text provides the surgeon and cardiologist with a unique review of the surgical options available for the treatment of patients with severe left ventricular dysfunction including their indications and results The full spectrum of surgical therapies is covered from the more conventional techniques of coronary artery bypass valve replacement left ventricular aneurysm resection and transplantation to the new technique of ventriculectomy The future of permanent mechanical hearts and xenotransplantation is also discussed The authors include an international panel of experts with recognized expertise in their fields

**Diagnosis and Treatment of Aortic Diseases** C.A. Nienaber,R. Fattori,1999-03-31 Describes recent surgical techniques developed to improve prognosis in aortic diseases and discusses recent interventional strategies such as endovascular stent graft placement and non surgical reconstruction of the aorta Chapters deal with aortic dissection aortic aneurysm surgical treatment of aortic aneurysms and dissections inherited disorders of the aorta aortic trauma aortitis and etiology and pathology of aortic malformations Each chapter is organized in a similar fashion with information on demographic aspects pathology clinical presentation and diagnostic and therapeutic approaches Annotation copyrighted by Book News Inc Portland OR **Progress in Catheter Ablation** Liong Bing Liem,Eugene Downar,2013-11-11 Catheter ablation is widely accepted as an effective and safe form of therapy for cardiac arrhythmia In many instances this curative procedure is considered as the first line of therapy if not the ultimate treatment of choice With the use of radiofrequency RF modality which has revolutionized the technology from a barotraumatic potentially injurious procedure using high voltage direct current DC shock to a safe and relatively painless one catheter ablation procedure now carries a very low risk and is extremely effective for certain types of arrhythmia Its efficacy rate in curing supraventricular tachycardia involving an accessory pathway or dual atrioventricular nodal pathways has been near perfect and its application for certain types of atrial and ventricular arrhythmia have also been very satisfactory However conventional RF ablation has several well known limitations most notably is its ability to only produce relatively small point lesions rendering it effective only for an

arrhythmia with a small and or a superficial target It was soon recognized that the technology would not likely to have significant utility in arrhythmia with a more widespread target such as atrial fibrillation or those which involve scarred and deep myocardial tissue such as ventricular tachycardia Indeed the application of conventional RF technology in these complex but common arrhythmia has yielded unsatisfactory results
