Carry This Message:

Carry This Message Joe McQ,2002 As an internationally respected teacher and lecturer on the Twelve Step method introduced by Alcoholics Anonymous Joe McQ knows that sponsorship is a key construct for the success of the program because it involves moving a person through the Twelve Step process to recovery In the early days of AA sponsors would come to the alcoholic s home and talk him through Steps 1 and 2 and when they were thoroughly convinced he was ready they would start him on the program Step 12 is the foundation of sponsorships Having had a spiritual awakening as the result of these steps we tried to carry this message to alcoholics to practice these principles in all our affairs Carry This Message addresses McQ s concern that sponsors have lost some skills in working with alcoholics AA sponsors need to refocus on the Big Book on the Twelve Steps and on their message urges McQ to recognize the value of the program and to return to its roots and essence Directed to sponsors this is a companion book to The Steps We Took offering tools for helping others find recovery and new life through the Twelve Step program

Step Twelve Anonymous,2022-07-26 This pamphlet examines Step Twelve Having had a spiritual awakening as the result of these steps we tried to carry this message to alcoholics and to practice these principles in all our affairs In this Step we give back some of what we ve gained This basic truth sums up Step Twelve you can t keep it without giving it away For generations people with addiction also known as substance use disorder tried many things to stay sober from religion to therapy The pioneers of Alcoholics Anonymous AA had a brilliant insight they could stay sober by putting their spiritual principles into action by helping others like themselves people with addiction This pamphlet summarizes the Twelfth Step mandate to carry the message of your spiritual awakening to others with substance use disorder Carrying the message is one of the best ways to maintain your sobriety It demonstrates how Step Twelve is the most joyous of the Steps to live that participating in the recovery of others is one of the fruits of your own hard won recovery As you pass on the message of recovery to others and learn more about yourself in the process you experience the joy that comes from helping others and nurturing your own spiritual growth

Step 12 AA Carrying the Message Anonymous,2010-09-08 Step 12 is about helping others in order to help ourselves This pamphlet explains how we can best keep of program of A A by giving it away Step 12 is about helping others in order to help ourselves This pamphlet explains how we can best keep of program of A A by giving it away

The Cavalry Journal , Parallelism and Programming in Classifier Systems Stephanie Forrest,2014-06-28 Parallelism and Programming in Classifier Systems deals with the computational properties of the underlying parallel machine including computational completeness programming and representation techniques and efficiency of algorithms In particular efficient classifier system implementations of symbolic data structures and reasoning procedures are presented and analyzed in detail The book shows how classifier systems can be used to implement a set of useful operations for the classification of knowledge in semantic networks A subset of the KL ONE language was chosen to demonstrate these operations Specifically the system performs the following tasks 1 given the KL ONE description of a particular semantic network the system produces a set of production rules classifiers that represent the network and 2 given the description of a new term the system determines the proper location of the new term in the existing network These two parts of the system are described in detail The implementation reveals certain computational properties of classifier systems including completeness operations that are particularly natural and efficient and those that are quite awkward The book shows how high level symbolic structures can be built up from classifier systems and it demonstrates that the parallelism of classifier systems can be exploited to implement them efficiently This is significant since classifier systems must construct large sophisticated models and reason about them if they are to be truly intelligent Parallel organizations are of interest to many areas of computer science such as hardware specification programming language design configuration of networks of separate machines and artificial intelligence This book concentrates on a particular type of parallel organization and a particular problem in the area of AI but the principles that are elucidated are applicable in the wider setting of computer science
