## Case Analysis in Clinical Ethics

*Case Analysis in Clinical Ethics* is a grounded review from a team of leading ethicists covering the main methods for analysing ethical problems in modern medicine. Anneke Lucassen, a clinician, begins by presenting an ethically challenging genetics case drawn from her clinical experience. It is then analysed from different theoretical points of view. Each ethicist takes a particular approach, illustrating it in action and giving the reader a basic grounding in its central elements. Each chapter can be read on its own, but comparison between them gives the reader a sense of how far methodology in medical ethics matters, and how different theoretical starting points can lead to different practical conclusions. At the end, Dr Lucassen gives a clinician's response to the various ethical methods described.

Practising clinical ethicists and students on upper level undergraduate and Master's degree courses in medical ethics and applied philosophy will find this invaluable.
