Case In Slavic:

Case in Slavic Richard D. Brecht, James S. Levine, 1986
Biskup, 2019-04-17 This monograph is concerned with prepositional elements in Slavic languages prepositions verbal prefixes and functional elements of prepositional nature It argues that verbal prefixes are incorporated prepositions projecting their argument structure in the complement of the verbal root and that their meaning is based on the two argument meaning of prepositions enriched with the CAUSE operator The book investigates idiomaticity in the realm of prefixed verbs and proposes a novel analysis of non compositional prefixed verbs based on the operation of predicate transfer It also offers a uniform analysis of cases Prepositional as well as non prepositional cases are treated as a reflection of the agreement operation whereat the type of prepositional case is determined by semantic properties of the decomposed preposition Furthermore it examines prepositions from a diachronic perspective and argues that they can be grammaticalised as future markers under certain circumstances

The Nominal Structure in Slavic and Beyond Lilia Schürcks, Anastasia Giannakidou, Urtzi Etxeberria, 2013-12-12 The contributions in this volume shed new light on the discussion of whether the DP hypothesis applies universally or not The issue is prominent not only for Slavic languages Drawing on evidence from many other languages Greek East Asian and Basque among them the book has important implications for answering fundamental questions about the nature of definiteness and quantification

Case and Aspect in Slavic Kylie R. Richardson, 2007-06-28 The role of structural case in syntax is arguably one of the most controversial topics in syntactic theory with important implications for semantic theory This book focuses on some of the most puzzling case marking patterns in the Slavic languages and ties these patterns to different types of aspectual phenomena showing that there is after all a pattern in the seeming chaos of case in the Slavic languages Kylie Richardson addresses links between the case marking on objects and the event structure of a verb phrase in Belarusian Russian Ukrainian Czech Slovak Polish and Bosnian Croatian Serbian and also shows that the links between case and aspect in the Slavic languages belong to a much larger pattern found in language in general She also focuses on links between case and grammatical aspect in depictive predicative participle and copular constructions in the East Slavic languages The book will appeal to scholars and advanced students of aspect and to all Slavicists

Parameters of Slavic Morphosyntax Steven Franks, 1995-05-11 Focusing on issues of case theory and comparative grammar this study treats selected problems in the syntax of the Slavic languages from the perspective of Government Binding theory Steven Franks seeks to develop parametric solutions to related constructions among the various Slavic languages A model of case based loosely on Jakobson's feature system is adapted to a variety of comparative problems in Slavic including across the board constructions quantification secondary predication null subject phenomena and voice Solutions considered make use of recent approaches to phrase structure including the VP internal subject hypothesis and the DP hypothesis The book will serve admirably as an introduction to GB theory for Slavic linguists as well as to the range of

problems posed by Slavic for general syntacticians Case and Grammatical Relations Greville G. Corbett, Michael Noonan, 2008-12-19 The papers in this volume can be grouped into two broad overlapping classes those dealing primarily with case and those dealing primarily with grammatical relations With regard to case topics include descriptions of the case systems of two Caucasian languages the problems of determining how many cases Russian has and whether Hungarian has a case system at all the issue of case combining the retention of the dative in Swedish dialects and genitive objects in the languages of Europe With regard to grammatical relations topics include the order of obliques in OV and VO languages the effects of the referential hierarchy on the distribution of grammatical relations the problem of whether the passive requires a subject category the relation between subjecthood and definiteness and the issue of how the loss of case and aspectual systems triggers the use of compensatory mechanisms in heritage Russian **Lithuania's Case for Independence** T.
