Case Studies in Drug Therapy Marjorie P. Johns, 1979 **Drugs in Use** Linda J. Dodds, 2013 *Drugs in Use* is a popular textbook that addresses one of the key issues for pharmacy students putting their learning into practice. The text presents a series of clinical case studies to illustrate how pharmacists can optimize drug therapy in response to the needs of individual patients. *Drugs in Use* Linda J. Dodds, 1991 *The Early Drug Courts*, 1998 *Pharmacotherapy Casebook* Terry L. Schwinghammer, Julia M. Koehler, 2011-08-05 More than 150 cases help you develop the problem solving and decision making skills necessary to succeed in real world clinical practice. *Pharmacotherapy Casebook* provides the case studies you need to learn how to identify and resolve drug therapy problems you are most likely to encounter in real world practice. This new edition is packed with 157 patient cases and makes the ideal study companion to the eighth edition of DiPiro's *Pharmacotherapy: A Pathophysiologic Approach*. The case chapters in this book are organized into organ system sections that correspond to those of the DiPiro textbook. By reading the relevant chapters in *Pharmacotherapy: A Pathophysiologic Approach* you will be able to familiarize yourself with the pathophysiology and pharmacology of each disease state included in this casebook. Everything you need to develop expertise in pharmacotherapy decision making. Realistic patient presentations include medical history, physical examination, and laboratory data, followed by a series of questions using a systematic problem solving approach. Compelling range of cases from the uncomplicated, a single disease state to the complex, multiple disease states and drug related problems. Diverse authorship from more than 190 clinicians from nearly 100 institutions. Coverage that integrates the biomedical and pharmaceutical sciences with therapeutics. Appendices containing valuable information on pharmacy abbreviations, laboratory tests, mathematical conversion factors, anthropometrics, and complementary and alternative therapies. **Pharmacotherapeutics for Advanced Practice** Virginia Poole Arcangelo, Andrew M. Peterson, 2006 This advanced pharmacotherapeutics text for nurse practitioners and physician assistants offers guidelines on prescribing drugs for over 50 common diseases and disorders. The book is organized by disorder rather than drug class and includes algorithms and case studies that illustrate critical thinking aspects of prescribing, such as drug selection, lifespan considerations, therapeutic drug monitoring, adverse reactions, unexpected outcomes, and when to change therapy. This Second Edition has new chapters on oncologic disorders and complementary and alternative medicines. Improved case studies reflect more realistic practice issues in decision making. Additional areas addressed include food drug interactions, dietary considerations, and concerns regarding geriatric patients. *Pharmacotherapy Casebook* Joseph T. DiPiro, 2002 Using a consistent problem solving approach, this new edition of *Pharmacotherapy Casebook* helps you apply the principles of pharmacotherapy to everyday real world clinical issues.
