

EDUC Policy prior to the late-1960's (1)

As you know, the dominant concern of politicians in the 1950s and 1960s was whether 'coloured immigrants' would fit into British society. These concerns influenced immigration debates, and were present in prominent academic accounts of 'race relations' (cf. Patterson's book *Dark Strangers* about the 'West Indian' population in Brixton). The important point here, is that educationalists viewed the offspring of such 'Strangers' - as a problem for the system.

The problem in turn was linked to their parents' culture. As Errol Lawrence argued in the second of his two articles in *The Empire Strikes Back* on 'black pathology', black families and their lifestyles were **stereotyped.**

The American Dream and the Public Schools Jennifer L. Hochschild, Nathan Scovronick, 2004-10-21 The American Dream and the Public Schools examines issues that have excited and divided Americans for years including desegregation school funding testing vouchers bilingual education and ability grouping While these are all separate problems much of the contention over them comes down to the same thing an apparent conflict between policies designed to promote each student's ability to succeed and those designed to insure the good of all students or the nation as a whole The authors show how policies to promote individual success too often benefit only those already privileged by race or class and often conflict with policies that are intended to benefit everyone They propose a framework that builds on our nation's rapidly changing population in order to help Americans get past acrimonious debates about schooling Their goal is to make public education work better so that all children can succeed

The Future of Test-Based Educational Accountability Katherine Ryan, Lorrie Shepard, 2010-03-17 In recent decades testing has become a much more visible and high stakes accountability mechanism that is now seen as a powerful tool that can be used to drive school improvement The purpose of this book is to identify and analyze the key issues associated with test based educational accountability and to chart the future of educational accountability research Chapter contributions are intended to be forward looking rather than a compendium of what has happened in the past The book provides an accessible discussion of issues such as validity test equating growth modeling fairness for special populations causal inferences and misuses of accountability data
