Body Geographic Barrie Jean Borich, 2019-05-15 A memoir from the award-winning author of *My Lesbian Husband*, Barrie Jean Borich's *Body Geographic* turns personal history into an inspired reflection on the points where place and person intersect, where running away meets running toward, and where dislocation means finding oneself. One coordinate of Borich's story is Chicago, the prototypical Great Lakes port city built by immigrants like her great grandfather, Big Petar, and the other is her own port of immigration, Minneapolis. The combined skylines of these two cities are tattooed on Borich's own back. Between Chicago and Minneapolis, Borich maps her own Midwest, a true heartland in which she measures the distance between the dreams and realities of her own life, her family's, and her fellow travelers in the endless American migration. Covering rough terrain from the hardships of her immigrant ancestors to the travails of her often-drunk young self longing to be madly awake in the world, from the changing demographics of midwestern cities to the personal transformations of coming out and living as a lesbian, *Body Geographic* is cartography of high literary order, plotting routes real and imagined and putting an alternate landscape on the map.

Mapping in Architectural Discourse Marc Schoonderbeek, 2021-11-29 This book explores the notion of mapping in architectural discourse. First locating, positioning, and theorizing mapping, it then makes explicit the relationship between research and design in architecture through cartography and spatial analysis. It proposes three distinct modalities: tool operation and concept showing, how these methods lead to discursive aspects of architectural work, and highlighting mapping as an instrument in developing architectural form. It

emphasizes the importance of place and time as fundamental terms with which to understand the role of mapping An investigation into architectural discourse this book will appeal to academics and researchers within the discipline with a particular interest in theory history and cartography

The Lie of the Land Ross Hunter, 2023-10-02 Maps are great if they show historians their borders tell stories Tales about the land tales about people who drew them They have lasting consequences This book explores some of those borders with the most to tell us History biography and politics all play a part Some of the oddest frontiers and some of the most painful consequences are examined from Palestine to The Punjab by way of Ireland The Caucasus The Balkans and Africa Not all stories are peaceful and the too forgotten fights of the Opium Wars and Kurdistan are examined along with the people who made the decisions This book is for anyone who has spent a happy hour reading a map and wondering just how and why some of those lines got to be where they are mostly boundaries but also other oddities and curiosities and for anyone perplexed by a news story from an exotic land far away in place or time Copiously illustrated with maps and pictures it is illuminating enjoyable and hopefully disturbing
