the item to the end user The customer will decide if the end price of the item is a bargain and is competitive As the shipper if the item is lost or damaged in shipping the expense of filing tracking and claims falls on him as well Drop Shipping is a proven way of reducing or eliminating many of these expenses thus making the end price lower for the consumer and more profitable for the seller With drop shipping a seller or retailer does not purchase the item and store it for resale but rather sells the merchandise and ships it directly from the manufacturer to the consumer The seller does not have to store the item or pay shipping from the manufacture to his location He does not have to handle the item himself This reduces chance of loss or damage and speeds up the process considerably He needs less start up money storage rental can be very costly and a product on hand that moves slower than anticipated can create a cash flow problem right out of the gate and can invest more time and money on his sales He also does not have to reship the item and there is only one shipping expense to absorb lowering the price of the item and making it of more value and profit for all concerned If there is loss or damage in shipping it falls on the manufacturer or distributor to provide the documents and file any claims with the shipping company involved Okay so all of this sounds great right But how do you get started This eBook will teach you how So let s get started

Dropshipping Shopify 2021 Robert D. Michaels,2021-08-01 Imagine a business where you could sell whatever you wanted without having to handle the product physically and being able to charge whatever price you wanted to charge on it This is essentially what dropshipping amounts to It is a wonderful business model you re going to learn all about it inside and out in this chapter There are some disadvantages as well that would be remiss of me not to remind you hof I ll cover those as well since it is unrealistic for you to assume that everything will always beat hunky dory Either way let s jump in and look at what dropshipping is Dropshipping is the process where a middleman retails a manufacturer s or wholesaler s product The middleman in this case is you the store owner The store owner takes care of all of the marketing aspects and drives traffic to

the order pages and the wholesaler takes care of product fulfillment such as delivery and packaging. In some cases you can even have the manufacturer brand the product with your own name and have them ship it to your customers. This business model is of immense help to the manufacturer and wholesaler since they get to focus on investing in what they know best which is manufacturing the product. You get to focus on what you know best which is to drive traffic and bring in sales. In effect you're a one person marketing team for the wholesaler's products. What's not to like? The customer will order the product via your website or sales channel and will pay you money. In turn you pay the wholesaler at their quoted price and you pocket the profits. The great thing about this business model is that it reduces inessential costs for all parties involved. Your startup costs are significantly lower than traditional retailers. This doesn't mean you can start for free. As I'll explain later it is in your best interest not to do so. However you get to skip all of those painful inventory and purchasing costs. In essence you get to run your business on a consignment basis from the wholesaler which is to say that you pay only when you receive an order from a customer.

The ultimate aim of every business is to maximize profits. In order to get the most out of the market a business is expected to offer quality products and services to the consumers it serves. The secret for satisfying the utility of consumers is creating a deep connection with them to understand their interests and how you can enhance your business. Also you must present your products/services in the market in a way that is appealing. This entails the use of various marketing concepts and aligning your strategies with the relevant trends in your industry. When it comes to earning an income online in 2021 and beyond there is a need to understand how to drive traffic to your website in a cheap, efficient and consistent manner. It is indisputable that drop shipping has become the mainstay for a large section of e-commerce. It serves as your home base, starting point and customers' destination for you. Your entire brand on e-commerce can rest on your drop shipping store. You will log into it every day to check the trends on the visits of all your important audiences to try and turn them into paying customers. It is important to learn how to maximize value for your store by marketing on social media. It is an effective way of reaching a wide audience easily considering that more than a third of the total global population is on social media. It is also a sure and efficient manner of turning the audience into loyal customers because it encourages engagement. The fact that social media allows for a two-way mode of communication makes it easy for consumers to converse with the brands they are interested in. Perhaps the best thing about social media promotion is that it provides a level playing field for small, medium and large enterprises. The same audience that a large business can access is the same that a start-up business can access. Notwithstanding it doesn't take up a huge budget to create a large number of social media fans in a short time. This forms the confidence that you can make it on social media even if you are a beginner. However how well it works for your business depends on the efforts you put into it. If you have tried before and failed you have probably not followed the best tactics there are to grow your brand on social media. Despite social media marketing being among the greatest phenomena in the digital

era some marketers are not able to achieve their social media marketing goals It takes careful planning and the use of effective strategies to make the best use of social media and grow your brand
