Annotation Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 90 years The Royal Society of chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume

*Alicyclic Compounds* Malcolm Sainsbury,2016-06-24 Rodd s Chemistry of Carbon Compounds Volume II Alicyclic Compounds surveys advances in the chemistry of three to six membered monocarbocycles from 1973 to 1991 This book begins with a detailed review of the conformations and stereochemical analyses of alicycles including higher members of the series and then proceeds to deal with the chemistry of individual ring systems The next chapters cover the prostaglandins and their allies and natural products bearing a cyclohexane cyclohexene or cyclohexadiene ring system A review of the chemistry of the cyclohexadienes and their metallic complexes is provided at the end This text also includes a list of common abbreviations and symbols This volume benefits chemical engineering students particularly those studying the components of organic chemicals      **Sulfur-Centered Reactive Intermediates in Chemistry and Biology** C. Chatgililoglu,Klaus-Dieter Asmus,2013-03-08 A wonderfully successful NATO Advanced Study Institute on Sulfur Centered Reactive Intermediates in Chemistry and Biology was held 18 30 June 1989 at the Hotel Villa del Mare in Maratea Italy Despite the beautiful setting with mountains behind us and over looking the clear blue Mediterranean Sea under a cloudless sky and with a private beach available the lectures were extremely well attended While some credit can go to the seriousness of the students more must go to the calibre of speakers and the high quality of C Chatgililoglu and Co Director Professor K D their presentations The Director Dr Asmus are to be congratulated for putting together such an outstanding scientific program Dr Chatgililoglu is also to be commended for arranging an equally stimulating social pro gram which included bus train and boat trips to many

local sites of interest It was particularly fitting that a meeting on the chemistry and biochemistry of sulfur should be held in Italy since Italian chemists have made major contributions to our understanding of the organic chemistry of sulfur including the chemistry of its reactive intermediates The early Italian interest in sulfur chemistry arose from the fact that Italy or more specifically Sicily was a major world producer of sulfur prior to the development and exploitation of the Frasch process in Texas and Louisiana
