*Congo* Michael Crichton,1995      **The Terminal Man** Michael Crichton,1972      George Grenfell and the Congo Harry Johnston,1910      Michael Crichton Elizabeth Trembley,1996-01-19 It will help Crichton s readers learn more about how significant events in his life affected the development of his fiction and literary style and how the heritage of popular fiction including mystery gothic adventure and science fiction influenced his writing This study provides close textual analysis of each novel by focusing on plot character development theme and critical interpretation      **1000 Facts about Writers** James Egan,2017-09 Ernest Hemingway shot himself in the legs with a machine gun while wrestling a shark George RR Martin can only type with one finger at a time Arthur Conan Doyle passionately believed in fairies Bram Stoker couldn t walk until he was seven CS Lewis couldn t use a typewriter Charles Dickens regularly visited the morgue and stared at the dead for hours Edgar Allen Poe made 9 for writing The Raven John Milton created more English words than anyone else in history Lewis Carrol wrote Alice s Adventures in Wonderland to show how stupid mathematics was Arthur Miller wrote Death of a Salesman in one day There are two naked women hidden on the front cover of F Scott Fitzgerald s book The Great Gatsby James Joyce wrote Ulysses in crayon JRR Tolkien was kidnapped when he was a toddler JK Rowling wrote the final chapter of the last Harry Potter book in 1990 seven years before the release of her first book      **The Science of Michael Crichton** Kevin R. Grazier,2008-02-09 Wherever the cutting edge of science goes Michael Crichton is there From dinosaur cloning to global warming nanotechnology to time travel animal behavior to human genetics Crichton always takes us to the cutting edge of science and then pushes the envelope The Science of Michael Crichton examines the amazing inventions of Crichton s books and lifts up the hood revealing the science underneath In intelligent and well thought essays scholars and experts decide what Crichton gets right and what he gets wrong They examine which Crichton imaginings are feasible and which are just plain impossible Scenarios examined include whether dinosaurs can be cloned if nanotechnological particles can evolve intelligence and if we can go back in time      **Color Monitors** Martin Kevorkian,2018-07-05 Color Monitors looks at a particular subset of imagined computer use focusing on scenarios that demand from the person at the keyboard an intimate technical knowledge My research has uncovered a peculiar pattern race comes into sharp relief when computer use is depicted as difficult labor requiring special expertise Time and again in such scenarios the helpful person of color is there to take the call to provide technical support to deal with the machines In interpreting such images Color Monitors analyzes the computer fearing strain in American whiteness an aspect of white identity that defines itself against information technology and the racial other imagined to love it and excel at it Martin Kevorkian Following up on Ralph Ellison s intimation that blacks serve as the machines inside the machine Color Monitors examines the designation of black bodies as natural machines for the information age Martin Kevorkian shows how African Americans are consistently depicted as highly skilled intelligent and technologically savvy as they work to solve complex computer problems in popular movies corporate advertising and

contemporary fiction But is this progress Or do such seemingly positive depictions have more disturbing implications Kevorkian provocatively asserts that whites historical fear of a black planet has in the age of microprocessing converged with a new fear of computers and the possibility that digital imperatives will engulf human creativity Analyzing escapist fantasies from Mission Impossible to Minority Report Kevorkian argues that the placement of a black man in front of a computer screen doubly reassures audiences he is nonthreatening safely occupied even imprisoned by the very machine he attempts to control an occupation that simultaneously frees the action heroes from any electronic headaches The study concludes with some alternatives to this scheme looking to a network of recent authors with shared affinities for Ellison and Pynchon willing to think inside the black box of technology Connecting race technology and American empire Color Monitors will attract attention from scholars working in emerging areas of race theory African American studies film studies cultural studies and technology and communication studies
