seeding democracy and economic development is replicable through identifying factors explaining the outcome of U S led post conflict reconstruction projects The analysis reveals that in addition to the effective use of material resources of power the outcome of reconstruction projects depends on a variety of other intertwined factors and Bridoux provides a new analytical framework relying on a Gramscian concept of power to develop a greater understanding of these factors and the ultimate success or failure of these reconstruction projects Appraising the effectiveness of American power in the contemporary international structure this work is a significant contribution to the field and will be of great interest to all scholars of foreign policy international relations and conflict studies Cyberspace Lawyer ,2006 **Tax Expenditures, Compendium of Background Material on Individual Provisions, December 2004, 108-2 Committee Print, S.
