## **Conjugacy Classes In Algebraic Groups Lecture Notes In Mathematics:**

**Conjugacy Classes in Algebraic Groups** R. Steinberg, 2006-11-15     Conjugacy Classes in Semisimple Algebraic Groups James E. Humphreys, 1995 Provides a useful exposition of results on the structure of semisimple algebraic groups over an arbitrary algebraically closed field After the fundamental work of Borel and Chevalley in the 1950s and 1960s further results were obtained over the next thirty years on conjugacy classes and centralizers of elements of such groups     **Linear Algebraic Groups and Finite Groups of Lie Type** Gunter Malle, Donna Testerman, 2011-09-08 Originating from a summer school taught by the authors this concise treatment includes many of the main results in the area An introductory chapter describes the fundamental results on linear algebraic groups culminating in the classification of semisimple groups The second chapter introduces more specialized topics in the subgroup structure of semisimple groups and describes the classification of the maximal subgroups of the simple algebraic groups The authors then systematically develop the subgroup structure of finite groups of Lie type as a consequence of the structural results on algebraic groups This approach will help students to understand the relationship between these two classes of groups The book covers many topics that are central to the subject but missing from existing textbooks The authors provide numerous instructive exercises and examples for those who are learning the subject as well as more advanced topics for research students working in related areas

**Representations of Algebraic Groups** Jens Carsten Jantzen, 2003 Gives an introduction to the general theory of representations of algebraic group schemes This title deals with representation theory of reductive algebraic groups and includes topics such as the description of simple modules vanishing theorems Borel Bott Weil theorem and Weyl's character formula and Schubert schemes and line bundles on them     Simple Singularities and Simple Algebraic Groups P.

Slodowy, 2006-11-15     **Conjugacy Classes in Algebraic Groups** Robert Steinberg, 1974     *Algebraic Groups. Utrecht 1986* Arjeh M. Cohen, Wim H. Hesselink, Wilberd L.J. van der Kallen, Jan R. Strooker, 2006-11-15 From 14 April 1986 a Symposium on Algebraic Groups was held at the University of Utrecht The Netherlands in celebration of the 350th birthday of the University and the 60th of T A Springer Recognized leaders in the field of algebraic groups and related areas gave lectures which covered wide and central areas of mathematics Though the fourteen papers in this volume are mostly original research contributions some survey articles are included Centering on the Symposium subject such diverse topics are covered as Discrete Subgroups of Lie Groups Invariant Theory D modules Lie Algebras Special Functions Group Actions on Varieties     *Centres of Centralizers of Unipotent Elements in Simple Algebraic Groups* Ross Lawther, Donna M. Testerman, 2011 Let  $G$  be a simple algebraic group defined over an algebraically closed field  $k$  whose characteristic is either 0 or a good prime for  $G$  and let  $u \in G$  be unipotent The authors study the centralizer  $C_G u$  especially its centre  $Z(C_G u)$  They calculate the Lie algebra of  $Z(C_G u)$  in particular determining its dimension they prove a succession of theorems of increasing generality the last of which provides a formula for  $\dim Z(C_G u)$  in terms of the labelled diagram associated to the conjugacy
