*Connectionist Natural Language Processing* Noel Sharkey, 2012-12-06 Connection science is a new information processing paradigm which attempts to imitate the architecture and process of the brain and brings together researchers from disciplines as diverse as computer science physics psychology philosophy linguistics biology engineering neuroscience and AI Work in Connectionist Natural Language Processing CNLP is now expanding rapidly yet much of the work is still only available in journals some of them quite obscure To make this research more accessible this book brings together an important and comprehensive set of articles from the journal CONNECTION SCIENCE which represent the state of the art in Connectionist natural language processing from speech recognition to discourse comprehension While it is quintessentially Connectionist it also deals with hybrid systems and will be of interest to both theoreticians as well as computer modellers Range of topics covered Connectionism and Cognitive Linguistics Motion Chomsky's Government binding Theory Syntactic Transformations on Distributed Representations Syntactic Neural Networks A Hybrid Symbolic Connectionist Model for Understanding of Nouns Connectionism and Determinism in a Syntactic Parser Context Free Grammar Recognition Script Recognition with Hierarchical Feature Maps Attention Mechanisms in Language Script Based Story Processing A Connectionist Account of Similarity in Vowel Harmony Learning Distributed Representations Connectionist Language Users Representation and Recognition of Temporal Patterns A Hybrid Model of Script Generation Networks that Learn about Phonological Features Pronunciation in Text to Speech Systems

Connectionist Approaches to Natural Language Processing R G Reilly, Noel Sharkey, 2016-07-22 Originally published in 1992 when connectionist natural language processing CNLP was a new and burgeoning research area this book represented a timely assessment of the state of the art in the field It includes contributions from some of the best known researchers in CNLP and covers a wide range of topics The book comprises four main sections dealing with connectionist approaches to semantics syntax the debate on representational adequacy and connectionist models of psycholinguistic processes The semantics and syntax sections deal with a variety of approaches to issues in these traditional linguistic domains covering the spectrum from pure connectionist approaches to hybrid models employing a mixture of connectionist and classical AI techniques The debate on the fundamental suitability of connectionist architectures for dealing with natural language processing is the focus of the section on representational adequacy The chapters in this section represent a range of positions on the issue from the view that connectionist models are intrinsically unsuitable for all but the associationistic aspects of natural language to the other extreme which holds that the classical conception of representation can be dispensed with altogether The final section of the book focuses on the application of connectionist models to the study of psycholinguistic processes This section is perhaps the most varied covering topics from speech perception and speech production to attentional deficits in reading An introduction is provided at the beginning of each section which highlights the main issues relating to the section topic and puts the constituent

chapters into a wider context

Parallel Natural Language Processing Geert Adriaens,Udo Hahn,1994 Parallel processing is not only a general topic of interest for computer scientists and researchers in artificial intelligence but it is gaining more and more attention in the community of scientists studying natural language and its processing computational linguists AI researchers psychologists The growing need to integrate large divergent bodies of knowledge in natural language processing applications or the belief that massively parallel systems are the only ones capable of handling the complexities and subtleties of natural language are just two examples of the reasons for this increasing interest
