Connections To Our World:

The Return of the Feminine and the World Soul Llewellyn Vaughan-Lee, 2009-11-01 The feminine holds the mystery of creation This simple and primordial truth is often overlooked but at this time of global crisis which also carries the seeds of a global transformation we need to reawaken to the spiritual power and potential of the feminine Feminine qualities belong to both men and women and they draw us into the depths within us into the mysteries of the soul whose wisdom is called Sophia Without the feminine nothing new can be born nothing new can come into existence we will remain caught in the materialistic images of life that are polluting our planet and desecrating our souls We need to return to the core of our being to where the sacred comes into existence And the mystical feminine holds the key to this work of redemption and transformation Over the past two decades Llewellyn Vaughan Lee has given different teachings on the feminine and the anima mundi the World Soul They are compiled here for the first time Llewellyn Vaughan Lee presents us with a clear picture of the Feminine which is now essential to building a new vision and value for our dear planet earth MARION WOODMAN Ph D Jungian Analyst and author This book is the work of an alchemist a vitally important contribution to the Great Work of rescuing the human soul from the darkness that currently shrouds it In this dangerous transitional time where ignorance confusion and cruelty abound its theme of the need for us to recover and comprehend the Feminine is of absolute and urgent relevance Few people are able to define and evoke the Feminine in the way that Llewellyn Vaughan Lee does in poetic and beautiful prose he speaks directly from his soul to ours acting as advocate for the longing of the anima mundi the World Soul to be welcomed once again into our lives and our culture He knows that this is the time of humanity s awakening each one of us participates in the mystery of the light hidden within us and within all nature that is being awakened For exploring this mystery so directly and deeply and with such insight he deserves our deepest gratitude Women and men alike will welcome and treasure this book ANNE BARING co author **The Myth of the Goddess Evolution of an Image and The Dream of the Cosmos A Quest for the Soul** **Popular Electricity and the World's Advance** Henry Walter Young, 1911

[A Variety of Causes](#) Paul Noordhof, 2020-09-03 This is the first book length defence of a counterfactual theory of causation The analysis defended is new It expresses the idea that independent of its competitors a cause raises the chance of an effect over its mean background chance by a complete causal chain The analysis depends upon a novel development of David Lewis s Theory of Counterfactuals One consequence of the analysis is that causation is not transitive Causation is also nonsymmetric The counterfactual basis of causal nonsymmetry is the result of a number of different and sometimes interacting nonsymmetries The analysis allows for the development of a novel theory of events whose nature is independent of their role in causation and the identification of one other important causal relationship property causation Although compatible with Hume s denial of necessary connections between distinct existences a key feature of the theory is that it benefits from being independent of the Humean framework There are two ways in which something may be metaphysically

fundamental vertically and horizontally Many metaphysicians emphasise vertical fundamentality and focus on truth making The book rejects this emphasis and the truth making approach in particular Horizontally fundamental metaphysical entities are those that are necessary components in different possible universes Causation has a claim to be horizontally fundamental the cement of any universe Laws are patterns of causation realised in different metaphysical frameworks such as those articulated by Lewis Armstrong and the powers ontologists The book recognises varieties of causation both in for example counting cases of double prevention and causation by genuine processes as types of causation and allowing that the analysis identifies causes across these different metaphysical frameworks Spiritual Power Llewellyn Vaughan-Lee,2019-01-31 Unlock the transformative power within and heal the world In Spiritual Power How It Works Llewellyn Vaughan Lee unveils the secrets to accessing and wielding spiritual power for personal and global change This revised edition offers a radical approach to our present global crisis revealing how spiritual activism can address the root causes of our ecocide and pave the way for a new story of Earth s unity Discover the ancient wisdom of the land harness the power of light and love and Understand the differences between worldly and spiritual power Access the light of the soul and break through materialism Embrace the feminine and reconnect with the sacred For spiritual seekers ready to move beyond personal transformation and become catalysts for a world in need of healing this is your guide to unlocking the transformative power within

Nothingness and Desire James W. Heisig,2013-07-31 The six lectures that make up this book were delivered in March 2011 at London University s School of Oriental and Asian Studies as the Jordan Lectures on Comparative Religion They revolve around the intersection of two ideas nothingness and desire as they apply to a re examination of the questions of self God morality property and the East West philosophical divide Rather than attempt to harmonize East and West philosophies into a single chorus Heisig undertakes what he calls a philosophical antiphony Through the simple call and response of a few representative voices Heisig tries to join the choir on both sides of the antiphony to relate the questions at hand to larger problems that press on the human community He argues that as problems like the technological devastation of the natural world the shrinking of elected governance through the expanding powers of financial institutions and the expropriation of alternate cultures of health and education spread freely through traditional civilizations across the world religious and philosophical responses can no longer afford to remain territorial in outlook Although the lectures often stress the importance of practice their principal preoccupation is with seeing the things of life more clearly Heisig explains By that I mean not just looking more closely at objects that come into my line of view from day to day but seeing them as mirrors in which I can see myself reflected Things do not just reveal parts of the world to me they also tell me something of how I see what I see and who it is that does the seeing To listen to what things have to say to me I need to break with the habit of thinking simply that it is I who mirror inside of myself the world outside and process what I have captured to make my way through life Only when this habit has been broken will I be able to start seeing through the reflections to scrape the tain off

the mirror as it were so that it becomes a window to the things of life as they are with only a pale reflection of myself left on the pane Everything seen through the looking glass myself included becomes an image on which reality has stamped itself This I am persuaded is the closest we can come to a ground for thinking reasonably and acting as true to life as we can
