Hodgson,1977-02-15 The Venture of Islam has been honored as a magisterial work of the mind since its publication in early 1975 In this three volume study illustrated with charts and maps Hodgson traces and interprets the historical development of Islamic civilization from before the birth of Muhammad to the middle of the twentieth century This work grew out of the famous course on Islamic civilization that Hodgson created and taught for many years at the University of Chicago In the second work of this three volume set Hodgson investigates the establishment of an international Islamic civilization through about 1500 This includes a theoretical discussion of cultural patterning in the Islamic world and the Occident This is a nonpareil work not only because of its command of its subject but also because it demonstrates how ideally history should be written *The New Yorker* [The Venture of Islam](#) Marshall G.
