Conscious Orientation Johannes Hermanus Hoop, 1937 **Ego** Peter Baumann, Michael W. Taft, 2011-09-01 **Ego** The Fall of the Twin Towers and the Rise of an Enlightened Humanity by Peter Baumann and Michael W Taft is the first book to explore the positive evolutionary potential hidden in one of the most destructive events in history In their examination of the evolutionary implications of 9 11 and its aftermath the authors contend we are not falling into the grip of a new dark age at all rather we are on the verge of a much brighter one as the Darwinian process of natural selection continues to advance humankind The authors inquiry led them to the roots of human suffering the ego That the ego underlies our problems as a species may come as no surprise But a deeper look into the ego s origin and history is full of unexpected revelations The modern human is dominated by a Stone Age brain Energy consumption and the environmental crisis is nothing more than the evolutionary drive to survive gone haywire Evolution has wired us to be riveted to bad news bad outcomes and worst case scenarios When beliefs are challenged it triggers a life or death stance in the human nervous system Emotions are mostly physical not mental The self we identify with along with its biases and beliefs turns out to be an evolutionary tool that made its first appearance some 50 000 years ago during what s called the conceptual revolution arguably the biggest developmental leap in human history The emerging ego accompanied our ability to construct complex tools create art and redefine social structure For the first time as a species we were able to imagine the future consider the thoughts of others and picture ourselves in our own minds The ego is a cognitive trick of natural selection intended to insure the survival of the individual Baumann and Taft say the problem comes when we take the ego s conceptualization of reality as the truth about who we actually are Using the latest research from neuroscience evolutionary biology psychology and paleontology Baumann and Taft show that modern humanity may be on the verge of an expansion of cognitive abilities akin to the development of the ego This next step will free the human mind to see beyond the confines of the prison and open the vast potential of conscious awareness

Lucid Waking: The Answer to the Problem of Consciousness Jack Tanner, 2021-07-27 There is no problem more baffling to the academic world than the problem of consciousness It s fair to say that no academic has any clue at all about what consciousness is In fact academics have totally confused it with something radically different namely sentience The problem that faces the academic world is the insurmountable one of how you get lifeless mindless purposeless objects material atoms to manifest subjectivity It s a category error to imagine that matter can provide any answers to the

foundational issues of mind Academics believe that to answer the problem of subjectivity is thereby to solve the hard problem of consciousness In fact the problem of subjectivity sentience is totally different from the problem of consciousness To understand why simply ponder all of the following statements 1 animals are sentient but not conscious 2 human babies are sentient but not conscious 3 humans who never encountered another human are sentient but not conscious 4 sleepwalking humans are sentient but not conscious The problem of sentience is drastically different from the problem of consciousness and if you conflate the two you have immediately set yourself an impossible task especially if you make any attempt to solve these problems within the framework of materialism i e the ideology of anti mind To understand what consciousness actually is it s essential to understand the difference in the world of sleep between dreaming and lucid dreaming Exactly the same dichotomy is present in the waking world A sleepwalker is a person who can do complex tasks such as riding a motorbike for half an hour without any consciousness A conscious version of a sleepwalker engages in what we refer to as lucid waking Lucid waking is the key to consciousness The fact is that consciousness is not an inherent property of human individuals It s not built into them It s acquired just as some people acquire the ability to become lucid dreamers Since sleepwalkers could do many of the same things as conscious individuals the question is invited of why consciousness is required at all If you don t know what consciousness is how can you expand your consciousness to the maximum Wouldn t you like to be maximally conscious Think of the power you would have
