*Consciousness and Mind* David M. Rosenthal, 2005 This volume gathers together the work of David Rosenthal on the philosophical study of consciousness from the past 20 years and represents his theory of consciousness as higher order thought An introduction draws out the connections between the essays and highlights their implications

*Consciousness*

Peter Carruthers, 2005-05-26 Peter Carruthers's essays on consciousness and related issues have had a substantial impact on the field and many of his best are now collected here in revised form The first half of the volume is devoted to developing elaborating and defending against competitors one particular sort of reductive explanation of phenomenal consciousness which Carruthers now refers to as dual content theory Phenomenal consciousness the feel of experience is supposed to constitute the hard problem for a scientific world view and many have claimed that it is an irredeemable mystery But Carruthers here claims to have explained it He argues that phenomenally conscious states are ones that possess both an analog fine grained intentional content and a corresponding higher order analog content representing the first order content of the experience It is the higher order analog content that enables our phenomenally conscious experiences to present themselves to us and that constitutes their distinctive subjective aspect or feel The next two chapters explore some of the differences between conscious experience and conscious thought and argue for the plausibility of some kind of eliminativism about conscious thinking while retaining realism about phenomenal consciousness Then the final four chapters focus on the minds of non human animals Carruthers argues that even if the experiences of animals aren't phenomenally conscious as his account probably implies this needn't prevent the frustrations and sufferings of animals from being appropriate objects of sympathy and concern Nor need it mean that there is any sort of radical Cartesian divide between our minds and theirs of deep significance for comparative psychology In the final chapter he argues provocatively that even insects have minds that include belief desire perception psychology much like our own So mindedness and phenomenal consciousness couldn't be further apart Carruthers's writing throughout is distinctively clear and direct The collection will be of great interest to anyone working in philosophy of mind or cognitive science

*Behavioural Methods in Consciousness Research* Morten

**Finding Consciousness**

**in the Brain** Peter G. Grossenbacher, 2001-05-15 How does the brain go about the business of being conscious Though we cannot yet provide a complete answer this book explains what is now known about the neural basis of human consciousness The last decade has witnessed the dawn of an exciting new era of cognitive neuroscience For example combination of new

imaging technologies and experimental study of attention has linked brain activity to specific psychological functions The authors are leaders in psychology and neuroscience who have conducted original research on consciousness They wish to communicate the highlights of this research to both specialists and interested others and hope that this volume will be read by students concerned with the neuroscientific underpinnings of subjective experience As a whole the book progresses from an overview of conscious awareness through careful explanation of identified neurocognitive systems and extends to theories which tackle global aspects of consciousness Series B Ten Problems of Consciousness Michael Tye,1997-01-22 Can neurophysiology ever reveal to us what it is like to smell a skunk or to experience pain In what does the feeling of happiness consist How is it that changes in the white and gray matter composing our brains generate subjective sensations and feelings These are several of the questions that Michael Tye addresses while formulating a new and enlightening theory about the phenomenal what it feels like aspect of consciousness The test of any such theory according to Tye lies in how well it handles ten critical problems of consciousness Tye argues that all experiences and all feelings represent things and that their phenomenal aspects are to be understood in terms of what they represent He develops this representational approach to consciousness in detail with great ingenuity and originality In the book s first part Tye lays out the domain the ten problems and an associated paradox along with all the theories currently available and the difficulties they face In part two he develops his intentionalist approach to consciousness Special summaries are provided in boxes and the ten problems are illustrated with cartoons A Bradford Book Representation and Mind series Integrating Philosophical and Scientific Approaches in Consciousness Research Christopher Gutland,Wenjing Cai,Anthony Vincent Fernandez,2021-06-29 **Consciousness, Function, and Representation** Ned Joel Block,2007 The first of a planned two volume collection of Ned Block s writings on philosophy of mind this volume treats consciousness functionalism and representation and can be regarded as Block s most complete statement of his positions on consciousness **Philosophical Topics** ,1999 Vols for 1981 include the proceedings of the Southwestern Philosophical Society **Harper's New Monthly Magazine** ,1876 **The Compositionality of Meaning and Content: Foundational issues** Markus Werning,Edouard Machery,Gerhard Schurz,2005 Representational systems such as language mind or brain exhibit a structure that is widely assumed to be compositional i e the semantic value of complex representations is determined by the semantic values of its parts Dating back to the late nineteenth century the principle of compositionality has recently regained wide attention Since the way the principle has been dealt with differs across disciplines the aim of these two volumes is to conjoin the diverging approaches The editors have assembled a collection of original essays that cover the topic of compositionality from virtually all perspectives of interest in the contemporary debate The well chosen international list of authors includes psychologists neuroscientists computer scientists linguists and philosophers among them D Bonnais Johannes Brandl Marc Breuer David Byrd Daniel Cohnitz Malte Dahlgr3n Reinaldo Elugardo Tim Fernando Kenneth Gemes Verena Gottschling Pierre Jacob Hannes Leitgeb Menno Lievers Alda Mari
