**Romanticism and Consciousness, Revisited** Joel Faflak, Richard C. Sha, 2022-05-26 With explosive interest in Romantic science and theories of mind and a renewed sense of the period's porousness to the world along with new developments in cognitive theory and research Romantic studies scholars have been called to revisit and re-map the terrain laid out in the highly influential 1970 volume *Romanticism and Consciousness* *Romanticism and Consciousness Revisited* brings this shift in approach to Romantic consciousness no longer the possession of a sole self but transactional social and entangled with the outside world up to date *The Natural Method* Eddy Nahmias, Thomas W. Polger, Wenqing Zhao, 2020-08-04 Prominent philosophers explore themes in the work of Owen Flanagan focusing on debates about the nature of mind the self and morality Owen Flanagan's work offers a model for how to be a naturalistic and scientifically informed philosopher who writes beautifully and deeply about topics as varied as consciousness and Buddhism moral psychology and dreaming identity and addiction literature and neuroscience In this volume leading philosophers Flanagan's friends colleagues and former students explore themes in his work focusing on debates over the nature of mind the self and morality Some contributors address Flanagan's work directly others are inspired by his work or methodology Their essays are variously penetrating and synoptic cautious and speculative **Nature: The nature of human nature** David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents

*Film, Art, and the Third Culture* Murray Smith, 2017-03-24 In the mid 1950s C P Snow began his campaign against the two cultures the debilitating divide as he saw it between traditional literary intellectual culture and the culture of the sciences urging in its place a third culture which would draw upon and integrate the resources of disciplines spanning the natural and social sciences the arts and the humanities Murray Smith argues that with the ever increasing influence of evolutionary theory and neuroscience and the pervasive presence of digital technologies Snow's challenge is more relevant than ever Working out how the scientific and everyday images of the world hang together is no simple matter In *Film Art and*

the Third Culture Smith explores this question in relation to the art technology and science of film in particular and to the world of the arts and aesthetic activity more generally In the first part of his book Smith explores the general strategies and principles necessary to build a third cultural or naturalized approach to film and art one that roots itself in an appreciation of scientific knowledge and method Smith then goes on to focus on the role of emotion in film and the other arts as an extended experiment in the third cultural integration of ideas on emotion spanning the arts humanities and sciences While acknowledging that not all of the questions we ask are scientific in nature Smith contends that we cannot disregard the insights wrought by taking a naturalized approach to the aesthetics of film and the other arts
