## **Consciousness And Immortality:**

*Man's Consciousness of Immortality* William Douglas Mackenzie, 1929      *Consciousness and Immortality* Tom Chalko, 2021-12-20 The purpose of this book is to show that everyone can achieve immortality of his her consciousness

*The Immortal Mind* Ervin Laszlo, 2014-10-09 Scientific evidence for the continual presence of consciousness with or without connection to a living organism Examines findings on the survival of consciousness beyond life including near death experiences after death communication and reincarnation Explains how this correlates precisely with cutting edge physics theories on superstrings information fields and energy matrices Reveals how consciousness manifests in living beings to continue its evolution Evidence now points to consciousness existing beyond the brain such as when the brain is temporarily incapacitated as well as to the survival of consciousness after death Conventional science prefers to dismiss these findings because they cannot be accommodated by a materialist view of reality Spirituality and religion embrace the continuity of consciousness and ascribe it to a nonmaterial spirit or soul that is immortal As such spirituality religion and science continually find conflict in their views But what if there truly is no conflict Based on a new scientific paradigm in sync with experience based spirituality Ervin Laszlo and Anthony Peake explore how consciousness is continually present in the cosmos and can exist without connection to a living organism They examine the rapidly growing body of scientific evidence supporting the continuity of consciousness including near death experiences after death communication reincarnation and neurosensory information received in altered states They explain how the persistence of consciousness beyond the demise of the body means that in essence we are not mortal we continue to exist even when our physical existence has come to an end This correlates precisely with cutting edge physics which posits that things in our plane of time and space are not intrinsically real but are manifestations of a hidden dimension where they exist in the form of superstrings information fields and energy matrices With proof that consciousness is basic to the cosmos and immortal in its deeper nonmanifest realm Laszlo and Peake reveal the purpose of consciousness is to manifest in living beings in order to continuously evolve

**Immortality** Stephen Cave, 2012-04-03 If you could live forever would you want to Both a fascinating look at the history of our strive for immortality and an investigation into whether living forever is really all it s cracked up to be A fascinating work of popular philosophy and history that both enlightens and entertains Stephen Cave investigates whether it just might be possible to live forever and whether we should want to He also makes a powerful argument that it s our very preoccupation with defying mortality that drives civilization Central to this book is the metaphor of a mountaintop where one can find the Immortals Since the dawn of humanity everyone whether they know it or not has been trying to climb that mountain But there are only four paths up its treacherous slope and there have only ever been four paths Throughout history people have wagered everything on their choice of the correct path and fought wars against those who ve chosen differently In drawing back the curtain on what compels humans to keep on keeping on Cave engages the reader in a number of mind

bending thought experiments He teases out the implications of each immortality gambit asking for example how long a person would live if they did manage to acquire a perfectly disease free body Or what would happen if a super being tried to round up the atomic constituents of all who ve died in order to resurrect them Or what our loved ones would really be doing in heaven if it does exist We re confronted with a series of brain rattling questions What would happen if tomorrow humanity discovered that there is no life but this one Would people continue to please their boss vie for the title of Year s Best Salesman Would three hundred year projects still get started If the four paths up the Mount of the Immortals lead nowhere if there is no getting up to the summit is there still reason to live And can civilization survive Immortality is a deeply satisfying book as optimistic about the human condition as it is insightful about the true arc of history **Human Immortality**

William James,2007-04-01 Originally a lecture given at Harvard as part of the Ingersoll Lecture on Immortality this small volume is psychologist William James s updated second edition which addresses criticisms levied against his original work on the nature of human immortality James sees the individual soul as part of a greater soul hidden behind the veil of death And that greater soul perhaps God perhaps an essence that defies description is eternal James brings together modern science and mysticism to show his audience that the two are not as incompatible as they might have believed Spiritual seekers religious individuals and even skeptics will find this discussion on the possibility of immortality thought provoking and electric American psychologist and philosopher WILLIAM JAMES 1842 1910 brother of novelist Henry James was a groundbreaking researcher at Harvard University and one of the most popular thinkers of the 19th century Among his many works are Principles of Psychology 1890 and The Varieties of Religious Experience A Study in Human Nature 1902

**Consciousness and Immortality** Leon James,2018-11-05 This book describes the anatomical layers of the human mind Modern neuroscience and psychology define consciousness in terms of the physical brain As a result materialistic science has no information to give us about our mind and personality in the afterlife of eternity You will find a very different approach in this book which is based on theistic psychology Using simple to understand diagrams charts and exercises the book explains the full development of the immortal human personality from birth to the afterlife of eternity The physical brain is temporary and then dies while the mind and personality are spiritual and immortal Details about the two day dying resuscitation procedure and the conditions of life in eternity are based on the empirical observations of Swedenborg who enjoyed dual consciousness for twenty seven years There is hardly anything that can be more important to us than learning how we can control the quality of our afterlife in eternity The main ideas of theistic psychology are introduced and their amazing scope is presented and illustrated as for instance 1 that our mind and personality are substantial organs in our true body which is spiritual and immortal 2 that a woman s consciousness of the world and her environment is created by feminine loves and feminine intelligence while a man s consciousness is created by masculine loves and masculine intelligence 3 that dying is a two day resuscitation process of being permanently disconnected from the physical body on earth after which we awaken and

continue our life in eternity with the immortal true body 4 that we then seek out and settle in one of the numerous afterlife societies that we freely select because the personality and outlook of its inhabitants are most compatible with our own personality and outlook 5 that people in all afterlife societies live as married couples in heavenly communities being conjoined soulmates while in hellish communities couples are intimate enemies who yet feel compelled to live with each other 6 that if we are willing to undergo regeneration of our inherited personality and make new lifestyle choices now then in the afterlife we can control our eternal destiny as to whether we will choose to settle in a happy heavenly community or in a noxious hellish one Scientific theories and philosophical doctrines are based on assumptions and conjectures of that which cannot be observed physically Theistic psychology is based on Sacred Scripture which presents God's instruction to both our lower natural mind and to our higher rational mind The literal meaning of the verses is addressed to our natural mind through historical events and commandments of worship and behavior This literal meaning of Sacred Scripture is used for the establishment of religion Theistic psychology is not related to religion although both are related to Sacred Scripture and God God has traditionally been associated with religion but since the discovery that there is a hidden psychological science in every verse of God's Word a new theistic science became evident that deals with the universal psychology of regeneration as instructed by God directly in the symbolic sense of Sacred Scripture Clearly God gives cultural religion for the natural mind but theistic psychology for the rational mind Leon James has written more than a dozen books on theistic psychology The current book focuses on mental anatomy and personality development in its totality from birth to immortal eternity in the afterlife To know what are the anatomical layers of human consciousness allows us to navigate through mental eternity and thus to control our immortal destiny whether it is to be happy and enhancing forever or else tragic and limiting forever

**Man's Consciousness of Immortality** W. Douglas Mackenzie,1929-02-05 [Creating the Soul Body](#) Robert E. Cox,2008-04-18 Outlines the principles and mechanics of the soul body the spiritual vehicle that enables individual consciousness to survive the body s death Shows that the ancient Vedic Egyptian Hebraic and Pythagorean traditions shared and understood this spiritual practice Reveals modern science as only now awakening to this ancient sacred science Ancient peoples the world over understood that individual consciousness is rooted in a universal field of consciousness and is therefore eternal surviving the passing of the physical body They engaged in spiritual practices to make that transition maximally auspicious These practices can be described as a kind of alchemy in which base elements are discarded and higher levels of consciousness are realized The result is the creation of a vehicle a soul body that carries consciousness beyond physical death These spiritual preparations are symbolized in the Vedic Egyptian and Hebraic traditions as a divine stairway or ladder a step by step path of ascent in which the practitioner raises consciousness by degrees until it comes to rest in the bosom of the infinite thereby becoming immortal This spiritual process explains the reincarnation of the Dalai Lama for example whose reincarnation is confirmed in infancy through physical and spiritual signs indicating that the consciousness has been carried from one lifetime to the next In [Creating the Soul Body](#) Robert Cox maps the spiritual journey of consciousness behind this sacred science of immortality and reveals the practice of creating a soul body in detail He also shows that this ancient spiritual science resembles advanced theories of modern science such as wave and particle theory and the unified field theory and reveals that modern science is only now awakening to this ancient science of immortality

Theology and Psychology Fraser Watts,2018-01-12 This title was first published in 2002 Many people are now interested in the relationship between religion and science but links between Christian belief and psychology have been relatively neglected This book opens up the dialogue between Christian theology and modern scientific psychology approaching the dialogue in both directions Current scientific topics like consciousness and artificial intelligence are examined from a religious perspective Christian themes such as God s purposes and activity in the world are then examined in the light of psychology This accessible study on psychology and Christian belief offers students and general readers alike important insights into new areas of the science and religion debate

**The Physical Basis of Immortality** Antoinette Louisa Brown Blackwell,1876

**Science and the Afterlife Experience** Chris Carter,2012-08-22 Reveals the evidence of life beyond death Examines 125 years of scientific research into reincarnation apparitions and communication with the dead showing these phenomena are real Reveals the existence of higher planes of consciousness where the souls of the dead can choose to advance or manifest once again on Earth Explains how these findings have been ignored and denied because they are incompatible with materialist doctrines In this book Chris Carter shows that evidence of life beyond death exists and has been around for millennia predating any organized religion Focusing on three key phenomena reincarnation apparitions and communications from the dead Carter reveals 125 years of documented scientific studies by independent researchers and the British and American Societies for Psychical Research that rule out hoaxes fraud and hallucinations and prove these afterlife phenomena are real The author examines historic and modern accounts of detailed past life memories visits from the deceased and communications with the dead via medium and automatic writing as well as the scientific methods used to confirm these experiences He explains how these findings on the afterlife have been ignored and denied because they are incompatible with the prevailing doctrine of materialism Sharing messages from the dead themselves describing the afterlife Carter reveals how consciousness exists outside the parameters of biological evolution and emerges through the medium of the brain to use the physical world as a springboard for growth After death souls can advance to higher planes of consciousness or manifest once again on Earth Carter s rigorous argument proves beyond any reasonable doubt not only that consciousness survives death and continues in the afterlife but that it precedes birth as well

**Cyclicity of Consciousness – Death Not as an End Point, but as a Turning Point** SEYED RASOUL HAMZAH,2026-02-05 The Introduction Consciousness Cyclicity Author Seyed Rasoul

Hamzah I The Philosophical Departure Beyond the Cartesian Duality In the annals of classical metaphysics death has historically been categorised as a terminal point a definitive full stop to the biological narrative Traditional thought has long been shackled by the Cartesian duality of body and soul However the Hamzah Model introduces a paradigm shift Within this framework death is recontextualised not as a cessation but as a Dynamic Shift within the architecture of time II The Critique of Linearity Conventional science views existence through a rigid linear lens Birth Maturity Senescence Death The End Mr Hamzah s treatise shatters this illusion The model posits that time is fractal and memory centric Rather than a straight line existence operates as a Recursive Spiral Death therefore is merely the turning point where consciousness undergoes a structural recalibration of memory and purpose III The 10 Step Simplified Protocol Protocol 10 To facilitate a clearer understanding of these complex quantum dynamics here is the simplified summary of the core thesis Non Linearity Life is a cycle not a line Time Time is governed by the density of memory not just the ticking of a clock The Turning Point Death is a transition phase where the self is restructured Memory Kernels Every thought and action is stored as a kernel in the universal field Recursive Awareness Awareness loops back to refine its own meaning The Field Theory Consciousness exists independently of biological hardware Entropy Resistance Unlike matter the consciousness resists decay through information preservation Semantic Generation Our existence s primary goal is the creation of meaning Post Biological Intelligence After the physical phase intelligence continues in a field state Universal Reintegration We are never lost we are simply re integrated into the cosmic memory IV The Hamzah Framework This work serves as a rigorous ontological map It suggests that the Memory Field acts as the fabric of the cosmos When the physical vessel fails the consciousness does not vanish it transitions into a Goal Directed Phase ensuring that the essence of the individual remains a permanent fixture of the universal intelligence I The Final Synthesis Death as a Phase Transition The quintessential finding of the Hamzah Model is that biological expiration does not equate to the annihilation of the conscious function Within this framework death is redefined as a Phase Systemic Transition from a local biological state to a non local cosmic awareness network Stable Oscillatory State Upon the cessation of physiological parameters the consciousness function  $\psi$  does not collapse to zero Instead it enters a state of Stable Oscillation remaining as a memory based wave reflecting within the cosmic field The Turning Point Death serves as the definitive bend in time where linear physical time freezes and the awareness field reaches its peak of memory density II Superiority over Classical Materialism The treatise provides rigorous mathematical and numerical proof including dual simulation Python models demonstrating the inadequacies of classical biological narratives Classical Failure Traditional models view death as a complete halt of the function state offering no mechanism for the persistence of meaning or memory The Hamzah Advantage By employing fractal derivatives and memory kernels the model justifies the continuation of identity and purpose in a non local phase It demonstrates that awareness is a quantum semantic wave with high stability independent of neuronal hardware III The 10 Step Simplified Summary Protocol 10 Following the

mandated protocol the extensive findings of the work are distilled into ten core principles Non Linear Eternity Existence is an infinite spiral of consciousness not a terminal biological line Time Dynamics Time at the point of death becomes twisted and reversible governed by memory rather than entropy The Psychon Particula Consciousness is carried by a non material stable particle that persists post death Memory Preservation No experience is nullified the Memory Field acts as a permanent cosmic archive Semantic Continuity Meaning emerges as a purposeful vector that grows even in the absence of a physical body Goal Re integration Unfinished goals are stored as residual frequencies and re written into the next evolutionary phase The turning Point Mechanism Death is the transition of consciousness from a local biological to a non local networked state Resurrection Potential Since identity is an oscillatory fractal pattern reconstruction is theoretically computable if the memory pattern is re stimulated Karma as Memory Actions are not judged but are stored as fractional biases in the fractal structure of the awareness field The Grand Field Every individual consciousness eventually re absorbs into the universal intelligence network IV Future Implications we are networks of oscillating awareness maintaining ourselves against the entropy of the void Death is but a temporary silence in an eternal melody

**The Oneness of the Eastern Heart and the Western Mind** Sri Chinmoy, 2014-03-22 This historic collection of all of Sri Chinmoy s university lectures in

eBook form has been released to commemorate the 50th anniversary of Sri Chinmoy's arrival in the West on 13 April 1964. Sri Chinmoy's very first university lecture was given at the University of the West Indies in Kingston, Jamaica, on 10 January 1968. It was entitled "Spirituality: What It Is and What It Is Not." This inaugurated a whole era of talks which saw Sri Chinmoy travelling ceaselessly across the length and breadth of America and around the world to address the youth of each country. He would spend countless hours travelling by car or train to reach far-flung universities, sometimes visiting two or even three in the course of a single day. After many of these sublimely inspiring discourses, he would answer questions from the audience or spend time instructing sincere seekers in the age-old practices of concentration, meditation, and contemplation. By the mid-seventies, Sri Chinmoy had spoken volumes and he began to include longer and longer periods of silent meditation in his lectures. Then, in 1984, in a significant departure from the spoken word, he introduced the theme of Peace Concerts. At these concerts, Sri Chinmoy would play his own soulful and devotional compositions on a variety of instruments of both Eastern and Western origin, meditating between each instrument and sometimes giving aphorisms on peace and related themes. In 2003, yet another form of Sri Chinmoy's self-offering unfolded when he travelled to a number of universities to honour distinguished professors for their significant contributions to the betterment of humanity by physically lifting them overhead. This remarkable endeavour was part of his "Lifting Up the World With a Oneness Heart" award programme. Thus, through words, silence, music, and a combination of physical and spiritual upliftment, Sri Chinmoy has shared his profound spiritual message with the aspiring Truth-seekers and God-lovers of the university world for four decades. Sri Chinmoy's words are mantras for the modern age, reverberating in our hearts with their timeless and truly life-transforming wisdom. In his exquisite prose, which is suffused with the very breath and cadence of poetry, Sri Chinmoy has revealed all the many stages of the seeker's journey towards the Golden Shores of the ever-transcending Beyond. For generations to come, these three volumes will awaken the inner mounting cry of seekers everywhere to achieve the highest Goal of Yoga: union with God in this life.
