Conflict And Clabification:

International Law and the Classification of Conflicts Elizabeth Wilmshurst,2012-08-02 International law separates international from non international conflicts This book discusses how this categorisation operates identifying the legal questions raised Case studies show how this impacts on issues like detention in armed conflict and the relationship between human rights and humanitarian law The International Tax Law Concept of Dividend Marjaana Helminen,2010-01-01 The distribution of profits between corporations resident in different jurisdictions gives rise to significant tax planning opportunities for multinational enterprises As cross border transactions between corporations grow in number and complexity the question of how a profit distribution is classified for corporate income tax purposes becomes increasingly important particularly in the context of issues such as double taxation non taxation and tax neutrality This unique and practical work covers the rules determining which transactions may be classified and therefore taxed as dividend income and how classification conflicts may be resolved The author examines the classification of various inter corporate transactions including and Payments made under dividend stripping arrangements and Fictitious profit distributions and Economic benefits in the context of transfer pricing and Returns on debt equity hybrids and Interest payments in thin capitalization situations and distributions following liquidation The analysis of each transaction refers to international tax law Most weight is given to tax treaties and EU tax law The approaches adopted in different statesand national tax law are covered by a more general analysis The comprehensive coverage and practical nature of The International Tax Law Concept of Dividend make it an essential acquisition for tax practitioners researchers and tax libraries worldwide **Encyclopedia of Information Science and Technology, Third Edition** Khosrow-Pour, D.B.A., Mehdi,2014-07-31 This 10 volume compilation of authoritative research based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities prospective solutions and future directions in the field of information science and technology Provided by publisher **"Conflict-Free" Socio-Economic Systems** Elena G. Popkova,2019-07-04 This book analyses the role of crisis or conflicts within socio economic systems and advocates the concept of a conflict free system as the landmark of global economic development **Classification of Conflicts in International Humanitarian Law** Noam Zamir,2017 Noam Zamir provides a thorough examination of the theoretical basis of classification of conflicts in international humanitarian law IHL with special focus on the legal impact of armed foreign intervention in civil wars Classification of Conflicts in International Humanitarian Law enriches the discourse on IHL by providing an in depth analysis of classification of conflicts and examining recent civil wars with foreign interventions such as the Libyan civil war 2011 Mali civil war 2012 2015 and the ongoing civil war in Yemen A Taxonomy of Armed Conflict Marko Milanovic,Vidan Hadzi-Vidanovic,2012 With some relatively minor exceptions international humanitarian law IHL applies only when a certain threshold is met the existence of an armed conflict or belligerent occupation The purpose of this

chapter is to explore the many difficulties surrounding the classification of armed conflicts in modern IHL. While the two main archetypes international armed conflict IAC and non international armed conflict NIAC are reasonably clear in their basic forms their boundaries are complex and obscure. Many recent conflicts do not fit the classical archetypes well provoking debates on spill over internationalized mixed or hybrid and even transnational armed conflicts. The chapter strives to show that there are some differences between IACs and NIACs that cannot be erased simply by reasoning from analogy or from moral imperative and that therefore the classification of armed conflict is an issue that matters and will continue to matter for the considerable future. The principal goal of the chapter is clarity clarity in a conceptual and doctrinal framework which can enable legal and policy debates to be properly had and argued without their participants talking past each other. In attempting to advance such clarity the chapter discusses the framework of war and peace in classical international law the conceptual revolution brought about by the aftermath of the Second World War and finally the modern law by developing a comprehensive taxonomy of armed conflict.

Activities organised within its framework gather representatives of those areas who share their knowledge and experience for the benefit of enhancing evidence based policy practice, quality and recognition of youth work and training. Results and other material are made available on the partnership website <http://youth-partnership.eu> and in various publications including the Training Kits. T Kits are thematic publications written by experienced youth trainers and experts and constitute easy to use handbooks for educational activities. All activities and publications enhance the exchange of experience and good practice between the actors involved and contribute to the implementation of the political objectives of both partner institutions.
