## **Conflicting Desire:**

Desire as Belief Alex Gregory, 2021 What is it to want something Or as philosophers might ask what is a desire The idea that we explain and evaluate actions with essential reference to what people want is compelling as it speaks to common sense ideas that our wants lie at the heart of our decision making Yet our wants seem to have a competitor our beliefs about what we ought to do Such normative beliefs alone may often suffice to explain our actions To try and resolve this tension this book defends desire as belief the view that desires are just a special subset of our normative beliefs This view entitles us to accept orthodox models of human motivation and rationality that explain those things with reference to desire while also making room for our normative beliefs to play a role in those domains This view also tells us to diverge from the orthodox view on which desires themselves can never be right or wrong Rather according to desire as belief our desires can themselves be assessed for their accuracy and they are wrong when they misrepresent normative features of the world Hume says that it is not contrary to reason to prefer the destruction of the whole world to the scratching of your finger but he is wrong it is foolish to prefer the destruction of the whole world to the scratching of your finger precisely because this preference misrepresents the relative worth of these things This book mounts an engaging and comprehensive defence of these ideas

*Causal Powers* Jonathan D. Jacobs, 2017-04-05 Causal powers are ubiquitous Electrons are negatively charged they have the power to repel other electrons Water is a solvent it has the power to dissolve salt We use concepts of causal powers and their relatives dispositions capacities abilities and so on to describe the world around us both in everyday life and in scientific practice But what is it about the world that makes such descriptions apt On one view the neo Humean view there is nothing intrinsic about say negative charge that makes its bearers have the power to repel other negatively charged particles Rather matters extrinsic to negative charge the patterns and regularities in which negatively charged particles are embedded fix the powers its bearers have But on a different view the anti Humean view causal powers are intrinsically powerful bringing with them their own causal nomic and modal nature independent of extrinsic patterns and regularities even fixing those patterns and regularities This collection brings together new and important work by both emerging scholars and those who helped shape the field on the nature of causal powers and the connections between causal powers and other phenomena within metaphysics philosophy of science and philosophy of mind Contributors discuss how one who takes causal powers to be in
