Confronting AIDS European Commission, European Commission. Directorate-General VIII - Development, World Bank, 1998

The Macroeconomics of HIV/AIDS Mr. Markus Haacker, 2004-11-19 This paper analyzes the macroeconomics of HIV/AIDS. The paper highlights that the mortality and morbidity associated with AIDS make it unlike most other types of sickness and disease. The paper describes the most common approaches used in accounting for growth in the context of an HIV/AIDS epidemic. The impact of HIV/AIDS on education and the accumulation of human capital is discussed. The paper also discusses the impact of HIV/AIDS on the public sector and elaborates certain demographic events specific to the HIV/AIDS pandemic.

HIV/AIDS and human development in sub-Saharan Africa Tanja R. Müller, 2023-08-28 This third part of the AWLAE series on HIV/AIDS and agriculture in sub-Saharan Africa focuses on the epidemic as a challenge to human development in general and rural development in particular. In the face of the impact of the epidemic as described in parts one and two of the series, the agricultural sector can play an important role in mitigating some of its effects. Strategies for agricultural intervention are of particular importance in sub-Saharan Africa given the fact that most of the countries hardest hit by the epidemic are heavily reliant on agriculture. Different agricultural sector based mitigation strategies are discussed. It is further argued, however, that such interventions need to be complemented by interventions from the health and other sectors in particular by treatment regimes including access to anti-retroviral drugs. The text is followed by an annotated bibliography.
