Casper,2013-11-12 This timely collection of original essays traces the migration of synthetic chemicals from the laboratory to the factory and then into the environment bodies and communities Turning our attention to the impact these chemicals have on our ecosystems human health social organization and political processes the contributors break new ground by focusing on the production and distribution of these potentially hazardous agents themselves rather than just detailing their effects Women's Studies Linda Krikos,Cindy Ingold,2004-08-30 This truly monumental work maps the literature of women s studies covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999 Intended as a reference and collection development tool this bibliography provides a guide for women s studies information for each title along with a detailed often evaluative review The annotations summarize each work s content its

importance or contribution to women's studies and its relationship to other titles on the subject. Core titles and titles that are out of print are noted and reviews indicate which titles are appropriate as texts or supplemental texts. This definitive guide to the literature of women's studies is a must purchase for academic libraries that support women's studies programs and it is a useful addition to any academic or public library that endeavors to represent the field. A team of subject specialists has taken on the immense task of documenting publications in the area of women's studies in the last decades of the 20th century. The result is this truly monumental work which maps the field covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999. Intended as a reference and collection development tool, this bibliography provides a guide for women's studies information for each title along with a detailed, often evaluative review. The annotations summarize each work's content, its importance or contribution to women's studies, and its relationship to other titles on the subject. Most reviews cite and describe similar and contrasting titles, substantially extending the coverage. Core titles and titles that are out of print are noted and reviews indicate which titles are appropriate as texts or supplemental texts. Taking up where the previous volume by Loeb, Searing, and Stineman left off, this is the definitive guide to the literature of women's studies. It is a must purchase for academic libraries that support women's studies programs and a welcome addition to any academic or public library that endeavors to represent the field.

**The WomanSource Catalog & Review** Ilene Rosoff, 1995

Reshaping the Contours of Breast Cancer Maren Elise Klawiter, 1999     *Caring*, 1998     Misdiagnosis Karen M. Hicks, 1994. For the first time in one volume of provocative essays, women speak out about their experiences with the American health care system. From victims to victors, their reflections in *Misdiagnosis: Woman As A Disease* serve as an inspirational clarion call to all women who have been on the short end of American medicine. It is also a wake up call to providers and institutions of medicine who for more than a century have treated women with arrogance and disrespect. Not since *Our Bodies, Ourselves* has a book about women's health been so powerful. Never before has any publication explored so many diverse and pertinent themes all through the eyes and in the words of women. Sometimes poignant but always provocative, *Misdiagnosis: Woman As A Disease* is a collection of essays and short works on the most important topics related to the woman's health experience. Women voice their reactions to the medicalization of childbirth, the reshaping of women by plastic surgery, the obvious flaws in physician training that lead to indifference and trivialization of women's health concerns, and so much more. In his preface to *Misdiagnosis: Woman As A Disease*, People's Medical Society President Charles B. Inlander indicts the medical system for decades of medical scandals perpetrated on women: DES, thalidomide, the Dalkon Shield, unnecessary hysterectomies, the sky-high cesarean section rate, silicone breast implants, all resulting in a long trail of victims. American medicine, he charges, has made the word woman a medical diagnosis. For decades, women have written of their experiences in the health care system, but never have their thoughts and ideas been collected in one volume. *Misdiagnosis: Woman As A Disease* is that volume.
