Confronting Images: Questioning the Ends of a Certain History of Art, **Confronting Images** Georges Didi-Huberman, 2005 According to Didi Huberman visual representation has an underside in which intelligible forms lose clarity and defy rational understanding Art historians he contends fail to engage this underside and he suggests that art historians look to Freud's concept of the dreamwork a mobile process that often involves substitution and contradiction

Didi-Huberman and the image Chari Larsson, 2020-09-29 Philosopher and art historian Georges Didi Huberman is one of the most innovative and influential critical thinkers writing today This book is the first English language study of his writing on images An image is a form of representation but what are the philosophical frameworks supporting it The book considers how Didi Huberman takes up this question repeatedly over the course of his career Placing his project in relation to major historical and intellectual contexts it shows not only how he modifies dominant disciplinary traditions but also how the study of images is central to a new way of thinking about poststructuralist inspired art history *A Theory of the Tache in*

Nineteenth-Century Painting Stein Sj?ad, 2017-07-05 Without question the tache blot patch stain is a central and recurring motif in nineteenth century modernist painting Manet's and the Impressionists rejection of academic finish produced a surface where the strokes of paint were presented directly as patches or blots then indirectly as legible signs C?nne Seurat and Signac painted exclusively with patches or dots Through a series of close readings this book looks at the tache as one of the most important features in nineteenth century modernism The tache is a potential meeting point between text and image and a pure trace of the artist's body Even though each manifestation of tacheism generates its own specific cultural effects this book represents the first time a scholar has looked at tacheism as a hidden continuum within modern art With a methodological framework drawn from the semiotics of text and image the author introduces a much needed fine tuning to the classic terms index symbol and icon The concept of the tache as a crossing of sign types enables finer distinctions and observations than have been available thus far within the Peircean tradition The sign crossing theory opens onto the whole terrain of interaction between visual art art criticism literature philosophy and psychology **Deconstruction and the**

Work of Art Martta Heikkil?a, 2021-07-29 The contemporary idea of the work of art is paradoxically both widely used and often unexamined Therefore we must re evaluate the concept before we can understand what the deconstruction of aesthetics means for thinkers like Jacques Derrida Jean Luc Nancy and Philippe Lacoue Labarthe By examining their analyses of works of visual art and contextualizing their thinking on the matter Martta Heikkil?a asserts that the implications of the work of art art and the aesthetic apply not only to philosophical questions but also to a broader area Instead of the totality represented by the historical concept of Art poststructuralist thinkers introduce the idea of the radical multiplicity of art and its works From this notion arises the fundamental issue in Derrida and the poststructuralist tradition how can we speak philosophically of art which always exists as singular instances as works In *Deconstruction and the Work of Art* Visual Arts

and Their Critique in Contemporary French Thought Heikkil shows that the deconstructionist notions of art are still influential in the discourses of contemporary art in which artworks proliferate and the concept of work is open ended and expanding This book offers an introduction to the deconstructionist theory of art and brings new perspectives to the complex undecidable relation between philosophy and art

Brian Rosenberg,1996 In *Little Dorrit's Shadows* Brian Rosenberg explores the specific relations between Dickens's ambivalent or self contradictory imagination and his creation of character arguing that contradiction and uncertainty do not merely color Dickens's characterization but account in large part for its distinctiveness and success Characters that seem initially to be thoroughly knowable prove in the end to be as present and absent definite and indefinite as shadows Rosenberg is fully familiar with Dickensian criticism and with commentary on the subject of characterization in general He concentrates on Dickens's eleventh novel *Little Dorrit* in which doubts and conflicts combine to shape the fictional structure on virtually every level And because *Little Dorrit* is founded on contradiction the contradictory elements in the characterization are granted free rein Working outward from close analyses of characterization in *Little Dorrit* to more general considerations of Dickens's other novels Rosenberg does justice both to the achievement of *Little Dorrit* and to the ways it resembles and differs from Dickens's fourteen other substantial texts **One to One** Charles W.
