- Voters are typically not informed enough to monitor their representatives.
- However, members of Congress behave as if voters were fully informed, because any issue might become salient in the next election.

## **Congressional Behavior:**

**Congressional Behavior** Nelson W. Polsby, 1925      **Homeward Bound** Glenn R. Parker, 2010-11-23 Richard Fenno first coined the term home style to describe the ways in which members of Congress cultivate the voters of their home constituencies He suggested that incumbents were paying more attention to their constituents than they had in the past In this book Glenn Parker examines the relationship between activities at home and in Washington asking specifically Why and when did congressmen and senators begin to pay more attention to their constituents And what are the institutional consequences of this change Using data drawn from the travel vouchers filed by incumbent senators and congressmen between 1959 and 1980 Parker shows that since the mid 1960s incumbents have been placing greater emphasis on service to their state or district Congress has facilitated this change in various ways such as by increasing travel allowances and by scheduling that minimizes the conflict between legislative business in Washington and time spent with constituents Parker s study includes both the Senate and House and he draws distinctions between the home style behaviors of senators and representatives He also provides a historical context for understanding the dynamics of changes in home style The time series data generate explanations that specify relationships among historical conditions individual behavior and institutional structures

**Foreign Policy and Congress** Marie T. Henahan, 2010-06-02 In the traditional view of foreign policy making in the United States the President is considered the primary authority and Congress is seen as playing a subsidiary role Marie T Henahan looks at the effects of events in the international system on both the content of foreign policy and what actions Congress takes on foreign policy Henahan argues that the only way to understand the way congressional behavior varies over time is by looking at the rise and resolution of critical issues in foreign policy which in turn have their origin in the international system When a critical foreign policy issue arises congressional activity and attempts to influence foreign policy increase Once the debate is resolved and one side wins a consensus emerges and Congress settles into a more passive role Using a data set consisting of all roll call votes on foreign policy issues taken by the Senate from 1897 to 1984 to generate indicators of Congressional behavior together with the rise and fall of critical issues in international relations Henahan is able to develop a more nuanced understanding of Congress s role in foreign policy making over time In recent years political scientists have begun to consider the impact of the international system on domestic policy Part of the difficulty of some of this work as well as work on Congress s role in foreign policy is that it has been limited in terms of time and the number of events the analysis considered depending on case studies This book offers a systematic consideration of the effects of international events on domestic politics crossing many different kinds of international activity and provides a unique longitudinal view of Congressional action on foreign policy This book will be of interest to scholars of international relations American foreign policy making and Congress Marie T Henahan is Assistant Professor of Political Science Vanderbilt University
