Statistics for Sensory and Consumer Science Tormod Næs,Per Bruun Brockhoff,Oliver Tomic,2011-06-20 As we move further into the 21st Century sensory and consumer studies continue to develop playing an important role in food science and industry These studies are crucial for understanding the relation between food properties on one side and human liking and buying behaviour on the other This book by a group of established scientists gives a comprehensive up to date overview of the most common

statistical methods for handling data from both trained sensory panels and consumer studies of food. It presents the topic in two distinct sections: problem orientated Part I and method orientated Part II, making it appropriate for people at different levels with respect to their statistical skills. This book successfully makes a clear distinction between studies using a trained sensory panel and studies using consumers. Concentrates on experimental studies with focus on how sensory assessors or consumers perceive and assess various product properties. Focuses on relationships between methods and techniques and on considering all of them as special cases of more general statistical methodologies. It is assumed that the reader has a basic knowledge of statistics and the most important data collection methods within sensory and consumer science. This text is aimed at food scientists and food engineers working in research and industry as well as food science students at master and PhD level. In addition, applied statisticians with special interest in food science will also find relevant information within the book.

Nature Policies and Landscape Policies Roberto Gambino, Attilia Peano, 2014-11-11. The book focuses on the relationship between nature conservation policies and landscape policies. This is a relevant subject due to the current need of reviving nature conservation policies which are today affected by a general effectiveness deficiency. To this end, landscape policies can play a crucial role bridging nature and culture, fostering more integrated approaches to nature conservation and stimulating the active participation of local communities. The book gathers reflections, researches, and experiences developed on an international level on this subject by experts coming from different international contexts: Europe, U.S.A., various disciplinary backgrounds: geographers, planners, biologists, historians, jurists, economists, etc. and several institutional bodies: Universities, administrative bodies, international organizations such as IUCN, EUROPARC, Federation UNESCO, etc. The overall reflections gathered in the book, which is divided in three main sections: regulations and institutional frameworks, policies, actions, and tools, combine to suggest innovative visions about the relationships between nature policies and landscape policies.

Marketing-Related Motives in Mergers & Acquisitions Denise Dahlhoff, 2013-11-22. Prompted by an increasing number of mergers and acquisitions in M&A in the U.S. food industry.

Multiple Criteria Decision Making Theory and Application G. Fandel, T. Gal, 2012-12-06. He considers a cone dominance problem given a preference cone IP and a set $n \times R$ of available or feasible alternatives. The problem is to identify the non-dominated elements of X . The nonzero elements of IP are assumed to model the dominance structure of the problem so that $y \succ X$ dominates $x \succ X$ if $Y \cdot x \cdot P$ for some nonzero $p \in S \cdot IP$. Consequently, $x \in X$ is non-dominated if and only if $x \in IP \cdot n \times X \cdot 1 \cdot 1$. He will also refer to non-dominated points as efficient points in X with respect to IP and we will let $EF \cdot X \cdot JP$ denote the set of such efficient points. This cone dominance problem draws its roots from two separate but related origins. The first of these is multi-attribute decision making in which the elements of the set X are endowed with various attributes each to be maximized or minimized.

Signaling Effects of Crowdfunding on Venture Investors' Decision Making Michael Mödl, 2020-08-31. Michael Mödl examines the impact and signaling effects of crowd-based start-up financing on

subsequent venture capital funding rounds The digital era has substantially expanded the entrepreneurial financing landscape and crowdfunding is emerging as a novel way for young innovative firms to secure scarce early stage funding As the evaluations of venture capitalists and business angels remain to be consequential for securing critical resources in later stages questions on the interactions between new and traditional forms of venture financing arise Drawing on choice experimental research designs the author provides causal empirical evidence that while the crowd is generally seen as a negative signal it can generate certain positive signals which increase the likelihood of professional venture investors to consider crowdfunded start ups for investment The presented findings yield important implications for capital seeking entrepreneurs investors and public policy Dr Michael Maximilian M dl completed his dissertation under supervision of Prof Dietmar Harhoff Ph D at Ludwig Maximilians Universit t M nchen and at the Max Planck Institute for Innovation and Competition

Price Management Hermann Simon, Martin Fassnacht, 2018-12-11 In this book the world s foremost experts on pricing integrate theoretical rigor and practical application to present a comprehensive resource that covers all areas of the field This volume brings together quantitative and qualitative approaches and highlights the most current innovations in theory and practice Going beyond the traditional constraints of price theory and price policy the authors coined the term price management to represent a holistic approach to pricing strategy and tactical implementation They remind us that the Ancient Romans used one word pretium to mean both price and value This is the fundamental philosophy that drives successful price management where producer and customer meet Featuring dozens of examples and case studies drawn from their extensive research consulting and teaching around the world Simon and Fassnacht cover all aspects of pricing following the price management process with its four phases strategy analysis decision and implementation Thereby the authors take into account the nuances across industry sectors including consumer goods industrial products services and trade distribution In particular they address the implications of technological advancements such as the Internet and new measurement and sensor technologies that have led to a wealth of price management innovations such as flat rates freemium pay per use or pay what you want They also address the emergence of new price metrics Big Data applications two sided price systems negative prices and the sharing economy as well as emerging payment systems such as bitcoin The result is a bible for leaders who recognize that price is not only a means to drive profit in the short term but a tool to generate sustained growth in shareholder value over the longer term and a primer for researchers instructors and students alike

Praise for Price Management This book is truly state of the art and the most comprehensive work in price management Prof Philip Kotler Kellogg School of Management Northwestern University This very important book builds an outstanding bridge between science and practice Kasper Rorsted CEO Adidas This book provides practical guidelines on value creation communication and management which is an imperative for businesses to survive in the coming era of uncertainty Dr Chang Gyu Hwang Chairman and CEO KT Corporation Korea Telecom
