

Seafood tools make an interesting genre to collect because there's so much diversity under the water.

Fish Fork & Knife

The fork's wide outside tine easily cuts thin filets. A curved point at the end of the knife helps remove skin and separate the fish into flaky segments. **COLLECTOR'S NOTE:** Fish knife blades were traditionally made of silver because the steel in old blades adversely reacts with the lemon often served with seafood.

Fried Oyster Server

The pierced and flared edge has the same shape as a macaroni server.

Small Cocktail Forks

The small forks, still common today, feature two or three short prongs. **COLLECTOR'S NOTE:** The unique fork/ spoon hybrid at right features a seaweed-and-barnacle design.

Oyster Fork

The utensil's short, flared, and curved tines (above) help detach the oyster from the shell.

Many pieces multitask. These shapes are interchangeable with escargot forks and nut picks.

Sardine Tong

The five or six tines curve outward to keep small servings in place.

Lobster Fork & Pick

Tines that narrow to a small tip on a lobster fork and pick make it easy to pluck delicate meat from the shell.

Fish Serving Set

The wide spatula blade and fork help lift and serve large portions of fish.

Every detail on this rare find was hand-applied.

WHERE TO BUY

Part of the fun of collecting vintage pieces is the hunt. Scout flea markets and antiques malls, as well as online sources. We like Replacements, Ltd. (replacements.com) and eBay.
