Conscience Market The:

Conscience and the Common Good Robert K. Vischer, 2010 Our society's longstanding commitment to the liberty of conscience has become strained by our increasingly muddled understanding of what conscience is and why we value it Too often we equate conscience with individual autonomy and so we reflexively favor the individual in any contest against group authority losing sight of the fact that a vibrant liberty of conscience requires a vibrant marketplace of morally distinct groups Defending individual autonomy is not the same as defending the liberty of conscience because although conscience is inescapably personal it is also inescapably relational Conscience is formed articulated and lived out through relationships and its viability depends on the law's willingness to protect the associations and venues through which individual consciences can flourish these are the myriad institutions that make up the space between the person and the state Conscience and the Common Good reframes the debate about conscience by bringing its relational dimension into focus Toxic Contamination of Livestock United States.
