Consciousness Revolution A Transatlantic Dialogue:

The Consciousness Revolution Stanislav Grof,1999 *The Consciousness Revolution* Stanislav Grof,Peter Russell,2003

In this book three pioneers at the cutting edge of Western thought reflect on the chances of peace in the world on how society is changing and on the changes we can make ourselves They consider the roles of art science education goals and values world views religion spirituality and above all consciousness for the state of our consciousness is the key issue underlying almost all others Back cover **The Consciousness Revolution** Stanislav Grof,Peter Russell,1999 AS WE ENTER THE 21ST CENTURY faced with current global and human crises society is being questioned as never before In *The Consciousness Revolution* three pioneers at the cutting edge of Western thought reflect on the chances of peace in the world on how society is changing and on the changes we can make in ourselves They consider the roles of art science education goals and values world views religion spirituality and above all consciousness for the state of our consciousness is the key issue underlying almost everything else As Ken Wilber asks in his Foreword what does it all finally come down to Peter Russell put it like this Each little bit counts we are all part of the same ground swell The most important question we need to ask is how can I put my own life in greater alignment with that ground swell How can I do my little one hundred thousandth worth to facilitate that shift a bit further These intense and memorable discussions among three of the finest minds of our time convey a sense of excitement and passion which we can carry forward in our own lives *The Consciousness Revolution* is an essential guide to how our map of reality is changing in the midst of the global transformations going on in all parts of the world and in every sphere of life in us and around us **The fabric(ation) of consciousness** Pieter F. Craffert ,2024-05-28 Consciousness is central to the quest for being human and for what the world is made of While there is widespread agreement on the significance of consciousness for clarifying the human condition there is no agreement on the phenomenon in search of theorising Although there is no shortage of theories and concepts of consciousness in current consciousness research the dominant critical analysis of consciousness research in this study although based on existing analyses is as far as I can see new and unique in arguing for a crisis in consciousness research This book touches on most aspects of consciousness research the hard problem of consciousness neural correlates of consciousness brain models and consciousness consciousness and dualistic thinking etc but is a critical analysis of consciousness research It is not an insider but a third person perspective on current consciousness research In this regard it differs from most introductions and overviews where these topics are presented from a first person perspective the insiders claim about their research Representing the broad spectrum of consciousness research in terms of the theoretical framework of a neuro ecological perspective is a new and innovative move **The Theory of Evolution** Oleg Bazaluk,2016-02-08 This book presents a historical philosophical analysis of the concept of evolution considering the degree of development of the theories of evolution in cosmology biology neurobiology and philosophy Evolution is defined here as the continuous and nonlinear

complication of the structure of matter and types of interaction and environments The book analyses existing approaches to the research of this concept in modern science and philosophy looking at the ways in which its factors and causes have previously been explored Unifying such interdisciplinary approaches to evolution in cosmology biology neurobiology and philosophy the book then discusses its own model Evolving Matter which considers not only the regularity of transition of a space vacuum in neural ensembles but also the universe as a complex non uniform organisation In addition the book contains systematised interdisciplinary information on the theory of evolution

[Tryptamine Palace](#) James Oroc,2009-05-21 A journey from Burning Man to the Akashic Field that suggest how 5 MeO DMT triggers the human capacity for higher knowledge through direct contact with the zero point field Examines Bufo alvarius toad venom which contains the potent natural psychedelic 5 MeO DMT and explores its entheogenic use Proposes a new connection between the findings of modern physics and the knowledge held by shamans and religious sages for millennia The venom from Bufo alvarius an unusual toad found in the Sonoran desert contains 5 MeO DMT a potent natural chemical similar in effect to the more common entheogen DMT The venom can be dried into a powder which some researchers speculate was used ceremonially by Amerindian shamans When smoked it prompts an instantaneous break with the physical world that causes out of body experiences completely removed from the conventional dimensions of reality In Tryptamine Palace James Oroc shares his personal experiences with 5 MeODMT which led to a complete transformation of his understanding of himself and of the very fabric of reality Driven to comprehend the transformational properties of this substance Oroc combined extensive studies of physics and philosophy with the epiphanies he gained from his time at Burning Man He discovered that ingesting tryptamines unlocked a fundamental human capacity for higher knowledge through direct contact with the zero point field of modern physics known to the ancients as the Akashic Field In the quantum world of nonlocal interactions the line between the physical and the mental dissolves 5 MeO DMT Oroc argues can act as a means to awaken the remarkable capacities of the human soul as well as restore experiential mystical spirituality to Western civilization
