Consciousness Separation Integration:

Consciousness Neil Rossman,1991-01-21 A central claim of this book is that the emergence of humanity involves a splitting of consciousness the ability of consciousness to become reflectively aware of itself But the splitting of consciousness is simultaneously the development of the possibility of fragmentation incoherence within consciousness and alienation non unity of consciousness with others and the world Thus through the growth of reflective consciousness separation comes to permeate the whole of human experience So understood it creates the need for integration and Rossman s discussion ultimately centers on its attainment Within this perspective various aspects of consciousness including perception organic sensation desire and belief are explored There is also extensive discussion of personal identity or the experience of being a self Finally the above analyses provide the ground for discussions of freedom morality and being religious Metaphysics of Consciousness Ramesh Chandra Pradhan,2020-09-03 This book explores the transition from the mind to the Supermind within the scope of an evolutionary metaphysics The idea of Supermind has not been discussed so far in the mainstream philosophy of mind and consciousness This book will give a new approach to the study of consciousness from the Indian vedantic perspective which has introduced the idea of Supermind especially in the works of Sri Aurobindo The book also undertakes a sustained critique of the contemporary theories of mind which have promoted mostly a mechanistic and naturalistic theory of mind and consciousness The book is meant for the researchers who are engaged in the study of consciousness and for those who are interested in the philosophy of mind in general This book will serve the purpose of the much needed counter perspective to the contemporary theories of mind working broadly within the materialist traditions
