Developing A Commanding Personality:

Developing a Commanding Personality Charles Robert Coates,1981 *Evolution of the Japanese, Social and Psychic*
Sidney Lewis Gulick,1903 **Building Strong Brands** David A. Aaker,2011-11-08 As industries turn increasingly hostile it is clear that strong brand building skills are needed to survive and prosper In David Aaker s pathbreaking book *Managing Brand Equity* managers discovered the value of a brand as a strategic asset and a company s primary source of competitive advantage Now in this compelling new work Aaker uses real brand building cases from Saturn General Electric Kodak Healthy Choice McDonald s and others to demonstrate how strong brands have been created and managed A common pitfall of brand strategists is to focus on brand attributes Aaker shows how to break out of the box by considering emotional and self expressive benefits and by introducing the brand as person brand as organization and brand as symbol perspectives The twin concepts of brand identity the brand image that brand strategists aspire to create or maintain and brand position that part of the brand identity that is to be actively communicated play a key role in managing the out of the box brand A second pitfall is to ignore the fact that individual brands are part of a larger system consisting of many intertwined and overlapping brands and subbrands Aaker shows how to manage the brand system to achieve clarity and synergy to adapt to a changing environment and to leverage brand assets into new markets and products Aaker also addresses practical management issues introducing a set of brand equity measures termed the brand equity ten to help those who measure and track brand equity across products and markets He presents and analyzes brand nurturing organizational forms that are responsive to the challenges of coordinated brands across markets products roles and contexts Potentially destructive organizational pressures to change a brand s identity and position are also discussed As executives in a wide range of industries seek to prevent their products and services from becoming commodities they are recommitting themselves to brands as a foundation of business strategy This new work will be essential reading for the battle ready *Evolution of the Japanese: Social and Psychic* Sidney L. Gulick,2005-12-01 An important reason for our Western thought that the Japanese have had no independence in philosophy is our ignorance of the larger part of Japanese and Chinese literature Oriental speculation was moving in a direction so diverse from that of the West that we are impressed more with the general similarity that prevails throughout it than with the evidences of individual differences Greater knowledge would reveal these differences In our generalized knowledge we see the uniformity so strongly that we fail to discover the originality from Chapter XVI American educator and missionary SIDNEY LEWIS GULICK 1860 1945 spent his life building a bridge between East and West during a period of immense confusion between the two diverse traditions During the more than 25 years he spent in Japan as a teacher and lecturer in a variety of subjects including English and religion he learned as much about Japanese society as he taught about Western culture and midway through his sojourn in the slowly modernizing nation he wrote this forgotten classic of social science First published in 1903 *Evolution of the Japanese* is a startling clear eyed assessment of a foreign way of life yet one

that evinces an atypical awareness on the writer's part of his own cultural assumptions about everything from the relative position of women and the habits of marital relationships to such traits of national character as cheerfulness industry jealousy and suspicion Art and family intellectualism and morality religion and philosophy Gulick discusses them all in this intriguing work one that reveals as much about the Western mind at the turn of the 20th century as it does about the Eastern
