INTRODUCTION

Music teachers will be very familiar with the challenge of supporting their students in developing musical ideas beyond the initial stages of composition. Students can write a few bars... and then grind to a temporary halt. In this resource we consider some ways in which students might develop their compositions by looking at a range of strategies employed by composers across a wide range of styles and genres.

These include looking at ways to break out of the confines of purely diatonic writing, where we suggest consideration of Messiaen's modes of limited transposition or Vaughan Williams's use of mediant relationships; developing original arrangements as typified by the work of Brian Wilson; using mathematics and magic squares as a way of generating some initial ideas for composition, with reference to the work of Peter Maxwell Davies; and the use of piano as percussion from Stravinsky through to the Velvet Underground.

THE BEACH BOYS

The Beach Boys' trademark has always been their wonderful harmonies and their original approach to song arrangement, where Brian Wilson would often eschew standard rock/pop instruments in favour of more esoteric or orchestral instruments. These instruments would be brought together in a bewildering array of ensemble groupings to play music that draws from a disparate range of genres and styles. The overall sheen and sophistication of their released recordings often draws the listener's attention away from what was a profoundly experimental band who were exploring unusual and unorthodox approaches to making music.

A song that typifies much of the above is "God Only Knows". This song combines elements of rock balladry, a classically inspired interlude and a choral fantasy, ending in the form of a perpetual round. The instrumental forces include a string quartet, accordion, clarinets, baritone saxophone and sleigh bells. Also worthy of note are the harmony and bassline, which typify Brian Wilson's approach to working with harmony and chord progressions.

In the liner notes to the *Pet Sounds* album, which features "God Only Knows", Carl Wilson writes:

"As a writer, Brian had such freedom and an enormous chord sense, and he was writing basslines that were so free from the norm... not on the root. "God Only Knows" is the classic example that takes it to a new plateau. The bass wasn't played in the same key in which the song was written. It was inverted."

Chord inversions and basslines

In this song, the key chord of E rarely has the root as its bass note – more often the B or G sharp, giving the song a restless, ambiguous feel in keeping with the lyrical content. Consider, for instance, the opening section. Here are the chords and bassline for bars 5 to 12. Notice also how the bassline moves in semitones before beginning a stepwise descent:

bar	5	6	7	8	9	10	11	12
chords	E	Cdim	E	A ⁷ m7-5	A	E	F#m	E
bass	B	C	B	A#	A	G#	F#	E
