Countries Pranab K. Bardhan,2007-01-01 Comparative and interdisciplinary perspectives on the current trend in the developing world of devolving political and economic power to local governments *African Development in a Comparative Perspective* ,2000 *Emerging Powers in a Comparative Perspective* Vidya Nadkarni,Norma C. Noonan,2013-02-14 The book examines the rising influence of emerging powers in global politics with a special focus on the BRIC countries Brazil Russia India China Chapters contributed by international scholars first look at the changing status of the US in the 21st century and at the EU as both an emerging and innovative power China s rising power status India s regional and global influence Russia s re emergence and Brazil s growing regional and international role are then analyzed comparatively to explain how the BRIC states are poised to become vital players not only in politics and economy but also in key international concerns such as terrorism globalization and climate change The book provides a detailed analysis of political economic security and foreign policy trends in the BRIC countries to address such questions as to whether they will seek to revise the international order or work within it and how they will deal with transnational global problems Using a unique comparative approach the text will appeal to undergraduate students in world politics international relations and foreign policy *The Rural to Urban Transition in Developing Countries* Amrutha Mary Varkey,2023-04-10 Increasing urbanisation and industrial

development are occurring at the expense of shrinking forest cover and agricultural land in South Asia. Various land uses compete with each other, reducing forests and farmlands. This book addresses urbanisation and peri-urban land markets with a special focus on Bangalore, one of the fastest growing cities in South Asia. It contributes to historic perspectives on the spatial transformation of peri-urban locales as well as providing much needed empirical evidence. The book discusses issues related to the context of peri-urban land use, land transactions, demand-supply relationships, and land prices in the peri-urban land market. The steep rise in land prices of the periphery, rapid changes in land use patterns, active land transactions, growth of the real estate market, and the challenge to implement efficient land use regulations are explored with the help of field evidence. Insights and challenges to land administration addressed in this book are common to other metropolitan cities, and the key message is that a separate peri-urban land policy is required for the major metropolitan cities of India and other developing countries. The book contributes to the understanding of how these spatial markets function in order to work towards an improved implementation of land policy in the context of dynamic rural-urban periphery. As such, it will appeal to researchers, scholars, and students of regional urban and agricultural economics, economic geography, urban and regional planning, and environmental science. It will also be of great interest to city planners and policy makers, action-based think tanks focused on urban governance.

Shaping the Developing World Andy Baker, 2021-01-07. Why are some countries rich and others poor? Colonialism, globalization, bad government, gender inequality, geography, and environmental degradation are just some of the potential answers to this complex question. Using a threefold framework of the West, the South, and the natural world, *Shaping the Developing World* provides a logical and intuitive structure for categorizing and evaluating the causes of underdevelopment. This interdisciplinary book also describes the social, political, and economic aspects of development and is relevant to students in political science, international studies, geography, sociology, economics, gender studies, and anthropology. The Second Edition has been updated to include the most recent development statistics and to incorporate new research on topics like climate change, democratization, religion, and prosperity, the resource curse, and more. This second edition also contains expanded discussions of gender, financial inclusion, crime, and police killings, and the Middle East, including the Syrian Civil War.

Urban Transport in the Developing World Harry T. Dimitriou, Ralph Gakenheimer, 2011-01-01. Policy making for urban transport and planning of economies in the developing world present major challenges for countries facing rapid urbanisation and rampant motorisation alongside growing commitments to sustainability. These challenges include coping with financial deficits, providing for the poor, dealing meaningfully with global warming and energy shortages, addressing traffic congestion and related land use issues, adopting green technologies, and adjusting equitably to the impacts of globalisation. This book presents a contemporary analysis of these challenges and new workable responses to the urban transport problems they spawn.
