Quantitative Development in Infancy and Early Childhood Kelly S. Mix, Janellen Huttenlocher, Susan Cohen Levine, 2002-04-04 This cutting edge book explores key issues raised by new findings in the study of quantitative development One question addressed is how the abilities reported in infants and young children relate to later development In some accounts one is left with the impression that infants possess all the fundamental skills that make up mature quantitative reasoning According to this view subsequent development seems to consist of little more than the gradual expression of these skills in increasing complex and explicit tasks This is a major departure from previously held views of quantitative development such as that of Piaget To evaluate these new claims the abilities attributed to infants are first evaluated and then the parameters of early childhood competencies are defined

Comparing the two developmental periods the authors evaluate the findings discuss the transition between these age periods and offer a framework for understanding later development of quantitative skills such as counting and calculation Underlying the argument throughout is an examination of the nativist versus empiricist debate that has taken center stage in infancy research

Social and Emotional Development in Infancy and Early Childhood Janette B. Benson, Marshall M. Haith, 2010-05-21 Research is increasingly showing the effects of family school and culture on the social emotional and personality development of children Much of this research concentrates on grade school and above but the most profound effects may occur much earlier in the 0 3 age range This volume consists of focused articles from the authoritative Encyclopedia of Infant and Early Childhood Development that specifically address this topic and collates research in this area in a way that isn't readily available in the existent literature covering such areas as adoption attachment birth order effects of day care discipline and compliance divorce emotion regulation family influences preschool routines separation anxiety shyness socialization effects of television etc This one volume reference provides an essential affordable reference for researchers graduate students and clinicians interested in social psychology and personality as well as those involved with cultural psychology and developmental psychology Presents literature on influences of families school and culture in one source saving users time searching for relevant related topics in multiple places and literatures in order to fully understand any one area Focused content on age 0 3 save time searching for and wading through lit on full age range for developmentally relevant info Concise understandable and authoritative for immediate applicability in research

Development of Perception in Infancy Martha E. Arterberry, Phillip J. Kellman, 2016-04-15 The developing infant can accomplish all important perceptual tasks that an adult can albeit with less skill or precision Through infant perception research infant responses to experiences enable researchers to reveal perceptual competence test hypotheses about processes and infer neural mechanisms and researchers are able to address age old questions about perception and the origins of knowledge In Development of Perception in Infancy The Cradle of Knowledge Revisited Martha E Arterberry and Philip J Kellman study the methods and data of scientific research on infant perception introducing and analyzing topics such as space pattern object and motion perception through philosophical theoretical and historical contexts Infant perception research is placed in a philosophical context by addressing the abilities with which humans appear to be born those that appear to emerge due to experience and the interaction of the two The theoretical perspective is informed by the ecological tradition and from such a perspective the authors focus on the information available for perception when it is used by the developing infant the fit between infant capabilities and environmental demands and the role of perceptual learning Since the original publication of this book in 1998 MIT Arterberry and Kellman address in addition the mechanisms of change placing the basic capacities of infants at different ages and exploring what it is that infants do with this information Significantly the authors feature the perceptual underpinnings of social and cognitive development and consider two

examples of atypical development congenital cataracts and Autism Spectrum Disorder Professionals and students alike will find this book a critical resource to understanding perception cognitive development social development infancy and developmental cognitive neuroscience as research on the origins of perception has changed forever our conceptions of how human mental life begins
